Style Function Transmission Evolutionary Archaeological Perspectives:

Style, Function, Transmission Michael John O'Brien, R. Lee Lyman, 2003 Darwin's theory of evolutionary descent with modification rests in part on the notion that there is heritable continuity affected by transmission between ancestor and descendant. It is precisely this continuity that allows one to trace phylogenetic histories between fossil taxa of various ages and recent taxa. Darwin was clear that were an analyst to attempt such tracings then the anatomical characters of choice are those least influenced by natural selection or what are today referred to as adaptively neutral traits. The transmission of these traits is influenced solely by such mechanisms as drift and not by natural selection. The application of Darwin's theory to archaeological phenomena requires that the theory be retooled to accommodate artifacts. One aspect that has undergone this retooling concerns cultural transmission, the mechanism that affects heritable continuity between cultural phenomena. Archaeologists have long traced what is readily interpreted as heritable continuity between artifacts but the theory underpinning their tracings is seldom explicit. Thus what have been referred to as artifacts styles underpin such tracings because styles are adaptively neutral. Other traits are referred to as functional. In their introduction to *Style Function Transmission* Michael O'Brien and R. Lee Lyman outline in detail the interrelations of a theory of cultural descent with modification and the concepts of drift, style and function. The chapters in the volume specifically address the issues of selection and drift and their relation to style and function. In non-polemic presentations contributors specify empirical implications of aspects of cultural transmission for evolutionary lineages of artifacts and then present archaeological data for those implications.

Lithic Technological Systems and Evolutionary Theory Society for American Archaeology. Annual Meeting, 2015-01-22 This collection of essays brings together several different evolutionary perspectives to demonstrate how lithic technological systems are a byproduct of human behavior. The essays cover a range of topics including human behavioral ecology, cultural transmission, phylogenetic analysis, macroevolution and various applications of evolutionary ecology.

Power and Identity in Archaeological Theory and Practice Eleanor Harrison-Buck, 2012-04-15 A new and broader approach to understanding power and identity in the Mesoamerican archaeological record.

Darwin's Legacy: The Status of Evolutionary Archaeology in Argentina Marcelo Cardillo, Hernán Muscio, 2016-01-22 This book collects the contributions to the symposium 'The current state of evolutionary archaeology in Argentina' that was held in Buenos Aires for celebrating the 200th anniversary of Charles Darwin's birth and the 150th anniversary of the publication of *On the Origin of Species*.

Quality Management in Archaeology Willem Willems, 2007-06-25 Quality Management in Archaeology deals with the effects of the profound changes that have had an impact on the discipline of archaeology all over the world. In North America, in Europe and increasingly in other parts of the world, new legislation and international treaties have changed its position in society. What was once a university-based research activity by a limited number of academics has become a socially relevant field with many practitioners that are mostly employed in some branch of archaeological resource.

management Archaeology has been successful in persuading governments and the general public that more should be done to preserve archaeological heritage and to investigate it where it will be irretrievably lost The scale and frequency of archaeological work has increased vastly at considerable cost to society Consequently there is pressure to do the work efficiently and economically At the same time academic standards have to be maintained to assure that the end result will be the relevant knowledge about the past that society pays for Different countries have found different approaches and solutions to deal with this dilemma Sometimes commercial archaeology is allowed sometimes it is not but in every national context quality has to be managed in some way This book presents a survey by specialists from the US Canada and several European countries on how this is done what the principles are and also the priorities It will be useful for anyone interested in archaeological resource management

Cultural Phylogenetics Larissa Mendoza Straffon, 2016-02-10 This book explores the potential and challenges of implementing evolutionary phylogenetic methods in archaeological research by discussing key concepts and presenting concrete applications of these approaches The volume is divided into two parts The first covers the theoretical and conceptual implications of using evolution based models in the sociocultural domain illustrates the sorts of questions that these methods can help answer and invites the reader to reflect on the opportunities and limitations of these perspectives The second part comprises case studies that address relevant empirical issues such as inferring patterns and rates of cultural transmission detecting selective pressures in cultural evolution and explaining the nature of cultural variation This book will appeal to archaeologists interested in applying evolutionary thinking and inferential methods to their field and to anyone interested in cultural evolution studies

Darwinian Sociocultural Evolution Marion Blute, 2010-01-14 Social scientists can learn a lot from evolutionary biology from systematics and principles of evolutionary ecology to theories of social interaction including competition conflict and cooperation as well as niche construction complexity eco evo devo and the role of the individual in evolutionary processes Darwinian sociocultural evolutionary theory applies the logic of Darwinism to social learning based cultural and social change With a multidisciplinary approach for graduate biologists philosophers sociologists anthropologists social psychologists archaeologists linguists economists political scientists and science and technology specialists the author presents this model of evolution drawing on a number of sophisticated aspects of biological evolutionary theory The approach brings together a broad and inclusive theoretical framework for understanding the social sciences which addresses many of the dilemmas at their forefront the relationship between history and necessity conflict and cooperation the ideal and the material and the problems of agency subjectivity and the nature of social structure

Defining and Measuring Diversity in Archaeology Metin I. Eren, Briggs Buchanan, 2022-07-18 Calculating the diversity of biological or cultural classes is a fundamental way of describing analyzing and understanding the world around us Understanding archaeological diversity is key to understanding human culture in the past Archaeologists have long experienced a tenuous relationship with statistics however the regular integration of diversity

measures and concepts into archaeological practice is becoming increasingly important This volume includes chapters that cover a wide range of archaeological applications of diversity measures Featuring studies of archaeological diversity ranging from the data driven to the theoretical from the Paleolithic to the Historic periods authors illustrate the range of data sets to which diversity measures can be applied as well as offer new methods to examine archaeological diversity Pottery Economics in Mesoamerica Christopher A.
