Subarachnoid Hemorrhage Major Problems In Neurology Vol 25:

Topical Problems in Psychiatry and Neurology, Vol. 10 H. T. Wycis, 1969-11-22 **Clinical Trials in the Neurosciences** Katherine M. Woodbury-Harris, Bruce M. Coull, 2009 A properly designed and executed clinical trial that addresses an important question and delivers a definitive result can change the practice of medicine worldwide This book encompasses a bench to bedside approach and serves as an excellent guidance for translating preclinical studies to early phase I II and phase III trials In the first part the book covers preclinical science with respect to animal models of various neurological diseases FDA requirements for preclinical studies translation of animal to patient studies and scaling up from animal to human studies In the second part the design of phase I II trials and the use of biomarkers as surrogate endpoints are discussed With regard to phase III trials FDA and European requirements specific design issues relevant clinical endpoints as well as data management and quality are examined Topics specific to multicenter trials such as design recruitment of special populations monitoring ethical and consent issues are also covered Finally genetics gene therapy imaging and surgical devices are reviewed This publication is highly recommended to clinician researchers such as neurologists neurosurgeons pediatric neurologists and neonatologists who want to design and conduct clinical trials in the neuroscience but also to nurses research coordinators and clinical pharmacologists **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70

Subarachnoid Hemorrhage Bryce Weir, 1998 Accurate diagnosis and appropriate management of subarachnoid hemorrhage SAH often presents a challenge for neurologists The author of this volume who is both a neurologist and a surgeon clarifies the steps a neurologist should take when a patient is at risk of SAH explains when surgery is advised and helps physicians to treat patients after SAH All of the causes of SAH including intracranial aneurysms are considered to provide a useful guide to case management Historical epidemiological and economic medico legal aspects are discussed initially followed by discussions of diagnosis pathology physiology and medical surgical and radiological therapies

Textbook of Neurointensive Care: Volume 1 Elizabeth Mahanna Gabrielli, Kristine H. O'Phelan, Monisha A. Kumar, Joshua Levine, Peter Le Roux, Andrea Gabrielli, A. Joseph Layon, 2024-10-21 This extensively updated edition provides a comprehensive review of intensive care for neurologically injured patients from the emergency room and ICU through the operating room and post surgical period in two comprehensive volumes The Editors of this first volume present a comprehensive textbook that incorporates best practice evidence based medicine and performance improvement while it champions the three characteristics needed in our neuro ICUs patient and family centered high quality care education and discovery This volume concentrates on neuroanatomy diagnostic assessment and disease management examining the neurological problems most frequently seen in intensive care and describes the various types of neurosurgery and critical features of the management of patients General issues are discussed across the textbook such as cardiac care fluids and

electrolytes nutrition and monitoring as well as more specific conditions and complications including elevated intracranial pressure seizures and altered mental states Listening to an injured brain is not easy It takes knowledge dedication and understanding of the critically ill patient and their family Textbook of Neurointensive Care Volume 1 Neuroanatomy Diagnostic Assessment Disease Management provides the reader with a detailed resource for studying this most complex area of medicine It is thus essential reading for all trainees and professionals in critical care neurosurgery anesthesia and neurology

Stabilizing Craniocervical Operations Calcium Antagonists in SAH
Current Legal Issues K.-A. Bushe, Mario Brock, Margareta Klinger, 2012-12-06 Demands on a Neurosurgeon Under Routine Clinical Conditions Hardly any other field of surgery requires such meticulous asepsis No other field requires such a protection of the tissue and such reliable hemostasis No one will question that neurosurgery makes exceedingly high demands However the degree of the demands on the personality of the surgeon who has to carry out very serious operations to the exclusion of all others and has little opportunity to recover psychologically by working on simpler cases is concealed from the outer world The mental strain which the coworkers and staff have to tolerate may not be denied So wrote Wilhelm Tonnies in 1939 Although fifty years have now elapsed his appraisal is still relevant today hence my intention to discuss the everyday demands placed on neurosurgeons My aim is not self glorification to engender sympathy rather it is to highlight the effects and repercussions of such demands for the well being of the patients entrusted to us The major onerous demands include those in the operating theater those resulting from staff problems in nursing those resulting from legal developments those resulting from the increasing administrative tasks that cost valuable time and energy which are lost to our actual work in looking after patients science and research also suffer from this I shall not go into the latter point within this preface Let me first turn to the strains occurring in the operating theater
