The Subject of Addiction Rik Loose, 2018 Drugs and drug use are an integral part of human culture Yet we know hardly anything about drugs at least not the kind of knowledge that would help us to understand how drugs affect people and how people become addicted to drugs This is most surprising in the light of the vast amount of knowledge accumulated in the sciences Psychoanalysis might not be an obvious choice for the treatment of addiction Nevertheless it is in an excellent position to make a contribution to a problem that has so far defied much of our understanding By inviting people to speak about themselves psychoanalysis has established a unique way of collecting clinical material a material that surely must be immediately relevant coming as it does from the horse's mouth With addiction on the increase this fact alone justifies the necessity for a different approach Providing a theoretical foundation for the argument that psychoanalysis should be seriously considered and where possible incorporated into the treatment of addicts this thoughtful and innovative book can serve as an orientation in the ongoing front line battle with addicts and addiction Divided into three parts the first part deals with Freud's writings on addiction including an in depth examination of his so called cocaine papers the second part examines how various strands of Freud's work on addiction were continued by his followers while the last part formulates a Lacanian theory of addiction This book is indispensable for anyone interested in addiction the evolution of Freud's work or contemporary psychoanalysis Provided by publisher

The Self Psychology of Addiction and its Treatment Richard B. Ulman, Harry Paul, 2013-04-03 In the time of Freud the typical psychoanalytic patient was afflicted with neurotic disorders however the modern day psychotherapy patient often suffers instead from a variety of addictive disorders As the treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help To address the shift and respond to contemporary patients needs Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options Their honest and unique work provides new

ideas that will help gain access to the fantasy worlds of addicted patients The Self Psychology of Addiction and Its Treatment emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction They use the representative subjects to develop a self psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date Psy-Complex in Question Ian Parker,2018-01-26 Tracing a series of key debates in and against the psy complex *Neurobiological Biomarkers for Developing Novel Treatments of Substance and Non-Substance Addiction* Yanhui Liao,Dara G. Ghahremani,Jianhua Chen,Kyoji Okita,Wenbin Guo,2021-12-03 **Lacan and Addiction** Yael Goldman Baldwin,2018-05-08 With chapters from Rik Loose Fabian Naparstek Patricia Gherovici Bruce Fink Thomos Svolos and many others the anthology is for people interested in the topic of addictions or in Lacanian psychoanalysis and especially for those interested in how the two intersect Lacan and Addiction is based on papers presented at a 2006 conference where Lacanians from around the world gathered to speak about addictions Conference participants explored the complexity of the problem for the individual society clinicians and for treatment In the current climate where addiction is mostly treated by variations of twelve step approaches and psychopharmacological countermeasures it is all too easy to lose sight of the dimensions of addiction that render it not just a disease to be managed but rather a significant form of human suffering and a subjective responsibility both of which are critical components of addiction treatment More and more addiction treatment is turning away from psychological and psychoanalytic theorization and towards psychopharmacological measures this anthology attempts to rectify that situation **Freud's Principal Case Studies Revisited** Helena Texier,Eve Watson,2025-05-30 Freud's Principal Case Studies Revisited explores Freud's six principal case studies studies Dora Little Hans Schreber the Wolf Man the Rat Man and the Young Homosexual Girl through the lens of contemporary psychoanalytic practice Thirteen leading Freudian Lacanian psychoanalysts reassess these cases in light of their significance to psychoanalytic theory and practice and consider their relevance in the twenty first century With new case material theory and analysis the cases are critically reinvigorated and restored to a privileged place within psychoanalysis Each of the cases is approached via a pairing of two psychoanalysts who engage with the clinical material as well as with each other in addressing their contributions to an assembled audience of clinicians trainees and scholars This book will be of great interest to psychoanalysts in practice and in training as well as psychologists psychotherapists and psychiatrists It will also be relevant for academics and students of psychoanalytic studies philosophy critical and cultural theory social studies critical psychology gender and sexuality studies and queer theory Lacan on Madness Patricia Gherovici,Manya Steinkoler,2015-02-11 This new collection of essays by distinguished international scholars and clinicians will revolutionize your understanding of madness Essential for those on

Intentionality, Desire, Responsibility A.W.M. Mooij, 2010-09-14 Recently the predominance of natural sciences seems to have cast doubt on the legitimacy of the human sciences Adopting a phenomenological and hermeneutical point of view this book is intended to contribute towards a justification of the human sciences taking account of quintessentially human characteristics The basic assumption is that man interprets his own experience and the world around him yielding to the limitations imposed by language Central themes are intentionality and causality desire and lack responsibility and loss of responsibility Relevant domains are psychopathology and psychoanalysis following Lacan's interpretation and law The rich phenomenological traditions in these domains will be drawn from throughout this book
