British Submarines in Two World Wars Norman Friedman, 2019-03-30 An indispensable guide to the Royal Navy's submarines through 1945 with numerous photos and original plans The Naval Review The Royal Navy didn't invent the submarine but in 1914 Britain had the largest submarine fleet in the world and at the end of World War I it had some of the largest and most unusual of all submarines whose origins and designs are all detailed in this book During the First World War they virtually closed the Baltic to German iron ore traffic and blocked supplies to the Turkish army at Gallipoli They were a major element in the North Sea battles and fought the U boat menace During World War II US submarines were known for strangling Japan but lesser known is the parallel battle by British submarines in the Mediterranean to strangle the German army in North Africa Like their US counterparts interwar British submarines were designed largely with the demands of a possible Pacific War though that was not the war they fought The author also shows how the demands of such a war fought over vast distances collided with interwar British Government attempts to limit costs It says much about the ingenuity of British submarine designers that they met their requirements despite enormous pressure The author shows how evolving strategic and tactical requirements and evolving technology produced successive types of design British submariners contributed much to the development of anti submarine tactics and technology beginning with largely unknown efforts before World War I Between the wars they exploited the new technology of sonar Asdic and as a result pioneered submarine silencing with important advantages to the US Navy as it observed the British They also pioneered the vital postwar use of submarines as anti submarine weapons sinking a U boat while both were submerged Heavily illustrated with photos and original plans and incorporating much original analysis this book is ideal for naval historians and enthusiasts Sure to become the standard reference for British submarine development for years to come
