Subterranean Copepods Crustacea Copepoda From Arid Western Australia:

Subterranean Copepoda from Arid Western Australia Tomislav Karanovich, 2004-02-01 Though the subterranean waters are among the most fragile and threatened ecosystems and are also considered to be rich in biodiversity there is very little information even on their total biological diversity Presenting one group of small crustaceans this book shows how rich and complex subterranean systems may be even in Australian desert regions This is the first comprehensive study of the subterranean copepods from Australia It contains descriptions of five new genera and 24 new species Many representatives of this unique fauna are of ancient origin dating as far back as Jurassic Because many questions of the copepod invasions of the freshwater and their connections with the main climatic changes are addressed this book will also be useful for a much broader scientific audience

Candoninae (Ostracoda) from the Pilbara Region in Western Australia Ivana Karanovic, 2007 The monograph describes the Candoninae fauna of the Pilbara region containing 84 species and 12 genera of which 83 species and 11 genera are endemic This ancient fauna holds one of the most important clues about the evolution of the subfamily

Studies on Freshwater Copepoda: a Volume in Honour of Bernard Dussart Danielle Defaye, Eduardo Suarez-Morales, J.C. von Vaupel Klein, 2011-10-06 The influence of Bernard Dussart's contributions to limnology in general as well as to freshwater copepodology in particular can hardly be overestimated From 1945 until his decease late 2008 he has devoted more than 60 years of his life to studying freshwater bodies and their inhabitants Next to his 200 scientific papers his frequent travels brought him all over the world where he invariably left an inheritance of enhanced interest in problems of freshwater biology and management The contributions in this book show the progress of research on the Copepoda found in continental waters and in part continue along the lines B Dussart has set out a worthy tribute to one of the very nestors of copepodology of fresh waters

Marine Interstitial Poecilostomatoida and Cyclopoida (Copepoda) of Australia Tomislav Karanovic, 2008-06-04 The prime function of the interstitial system is the processing of organic material flushed into the sand It functions as a carbon sink which has significant implications in this age in which we are trying to fight carbon levels in the atmosphere Copepods are top predators here and thus crucially important This book presents the first data about cyclopoid and poecilostomatoid copepods from the Australian marine interstitial It includes one new cyclopoid family the second record of the poecilostomatoid family Polyankyaliidae one new genus and 21 new species A zoogeographic analysis of the copepods recorded emphasizes the importance of looking at small scale patterns when inferring Gondwanaland biogeography and a number of distinct zoogeographic regions is now becoming apparent in Australia

Groundwater Ecology and Evolution Florian Malard, Christian Griebler, Sylvie Retaux, 2023-03-11 Groundwater Ecology and Evolution Second Edition is designed to meet a multitude of audience needs The state of the art in the discipline is provided by the articulation of six sections The first three sections successively carry the reader into the basic attributes of groundwater ecosystems section 1 the drivers and patterns of biodiversity section 2 and the roles of organisms in

Australian Journal of Botany ,2006 World Directory of Crustacea Copepoda of Inland Waters Bernard Dussart,Danielle Defaye,2002 **On the Ecology of Australia's Arid Zone** Hans Lambers,2018-08-21 This book will appeal to an international audience as well as be irresistible to local readers Anyone working or with an interest in Australia s arid zone should need ready access to this book There is no equivalent publication out there at the moment and this book has many authoritative chapters richly illustrated with colourful material The challenge of this book was to assemble current knowledge on particular topics and concepts and principles relating to them It is also forward looking by identifying where there are gaps or inadequacies in knowledge and where future research needs to be directed Lead authors were encouraged to take such an approach they had the opportunity to involve any author they considered appropriate The final product shouldbe a fabulous resource also for university courses especially at MSc level *Records of the Western Australian Museum* Tomislav Karanovic,2006
