Suburban Sprawl Culture Theory And Politics:

Suburban Sprawl Matthew J. Lindstrom, Hugh Bartling, 2003 This book provides a comprehensive multi disciplinary analysis of suburban sprawl development and smart growth alternatives within the contexts of culture ecology and politics It offers a mix of theoretical inquiry historical analysis policy critique and case studies In addition each chapter is coupled with featured interviews with leading activists and policymakers working on sprawl issues Visit our website for sample chapters

The Working Landscape Peter F. Cannavo, 2007-06-22 In America today we see rampant development unsustainable resource exploitation and commodification ruin both natural and built landscapes disconnecting us from our surroundings and threatening our fundamental sense of place Meanwhile preservationists often respond with a counterproductive stance that rejects virtually any change in the landscape In *The Working Landscape* Peter Cannav identifies this zero sum conflict between development and preservation as a major factor behind our contemporary crisis of place Cannav offers practical and theoretical alternatives to this deadlocked polarized politics of place by proposing an approach that embraces both change and stability and unifies democratic and ecological values creating a working landscape Place Cannav argues is not just an object but an essential human practice that involves the physical and conceptual organization of our surroundings into a coherent enduring landscape This practice must balance development which he calls founding and preservation Three case studies illustrate the polarizing development preservation conflict the debate over the logging of old growth forests in the Pacific Northwest the problem of urban sprawl and the redevelopment of the former site of the World Trade Center in New York City Cannav suggests that regional democratic governance is the best framework for integrating development and preservation and he presents specific policy recommendations that aim to create a working landscape in rural suburban and urban areas A postscript on the mass exile displacement and homelessness caused by Hurricane Katrina considers the implications of future climate change for the practice of place

Urban Politics Bernard H. Ross, Myron A. Levine, 2011-08-10 This popular text mixes the best classic theory and research on urban politics with the most recent developments in urban and metropolitan affairs Its very balanced and realistic approach helps students to understand the nature of urban politics and the difficulty of finding effective solutions in a suburban and global age The eighth edition provides a comprehensive review and analysis of urban policy under the Obama administration and brand new coverage of sustainable urban development A new chapter on globalization and its impact on cities brings the history of urban development up to date and a focus on the politics of local economic development underscores how questions of economic development have come to dominate the local arena The book traces the changing style of community participation including the emergence of CDCs BIDs and other new style service organizations It analyzes the impacts of the New Regionalism the New Urbanism and much more at an approachable level The eighth edition is significantly shorter and more affordable than previous editions and the entire text has been thoroughly rewritten to engage students Boxed case studies of prominent

recent and current urban development efforts provide material for class discussion and concluding material demonstrates the tradeoff between more ideal and more pragmatic urban politics Source material provides Internet addresses for further research

Marxism and Real Estate Development Julian Roche, 2023-09-01 This book straddles two worlds and attempts to bring them together that of Lefebvre's Marxism on the one hand and that of real estate development on the other Lefebvre has now become a household name amongst many contemporary Marxists especially those with an interest in urban planning and certain quarters of the architectural profession however his work is far less well known by real estate professionals whether investors developers brokers or indeed policymakers Marxism and Real Estate Taking Lefebvre Seriously has both a large scope and a very bold aim to use an explication and analysis of the work of Henri Lefebvre not only to present a critique of development but also to draw these two worlds together It therefore first aims to present the arguments of this increasingly well known French Marxist philosopher sociologist and pioneer of urban studies second to situate contemporary real estate development in the light of Lefebvre's work and third to analyse the potential application of Lefebvre's work to each of the major components of contemporary real estate to use Lefebvre's work in order to recommend practical action for developers working alongside planners and architects to influence the future of global real estate As well as its direction at developers themselves this book should be of interest to economists real estate researchers and professionals planners urban studies scholars and of course to those interested in the application of Lefebvre's work to real estate

A Guide to Impact Fees and Housing Affordability Arthur C. Nelson, Liza K. Bowles, Julian C. Juergensmeyer, James C. Nicholas, 2012-06-22 Impact fees are one time charges that are applied to new residential developments by local governments that are seeking funds to pay for the construction or expansion of public facilities such as water and sewer systems schools libraries and parks and recreation facilities In the face of taxpayer revolts against increases in property taxes impact fees are used increasingly by local governments throughout the U S to finance construction or improvement of their infrastructure Recent estimates suggest that 60 percent of all American cities with over 25 000 residents use some form of impact fees In California it is estimated that 90 percent of such cities impose impact fees For more than thirty years impact fees have been calculated based on proportionate share of the cost of the infrastructure improvements that are to be funded by the fees However neither laws nor courts have ensured that fees charged to new homes are themselves proportionate For example the impact fee may be the same for every home in a new development even when homes vary widely in size and selling price Data show however that smaller and less costly homes have fewer people living in them and thus less impact on facilities than larger homes This use of a flat impact fee for all residential units disproportionately affects lower income residents The purpose of this guidebook is to help practitioners design impact fees that are equitable It demonstrates exactly how a fair impact fee program can be designed and implemented In addition it includes information on the history of impact fees discusses alternatives to impact fees and summarizes state legislation that can influence the design of local fee programs Case studies

provide useful illustrations of successful programs This book should be the first place that planning professionals public officials land use lawyers developers homebuilders and citizen activists turn for help in crafting or recrafting proportionate share impact fee programs **Cumulative Effects in Wildlife Management** Paul R Krausman, Lisa K. Harris, 2011-03-09

As humans continue to encroach on wildlands quality and quantity of wildlife habitat decreases before our eyes A housing development here a shopping mall there a few more trees cut here another road put in there each of these diminishes available habitat Unless the cumulative effects of multiple simultaneous development projects are recognized **Tourism, Ethnic Diversity and the City** Jan Rath, 2007-05-07 Informative and enlightening Rath fills a gap in existing research in terms of how immigration relates to urban tourism and investigates the new theoretical insights using revealing international case studies *The Wrath of Capital* Adrian Parr, 2014-09-02 Although climate change has become the dominant concern of the twenty first century global powers refuse to implement the changes necessary to reverse these trends Instead they have neoliberalized nature and climate change politics and discourse and there are indications of a more virulent strain of capital accumulation on the horizon Adrian Parr calls attention to the problematic socioeconomic conditions of neoliberal capitalism underpinning the world's environmental challenges and she argues that until we grasp the implications of neoliberalism's interference in climate change talks and policy humanity is on track to an irreversible crisis Parr not only exposes the global failure to produce equitable political options for environmental regulation but she also breaks down the dominant political paradigms hindering the discovery of viable alternatives She highlights the neoliberalization of nature in the development of green technologies land use dietary habits reproductive practices consumption patterns design strategies and media She dismisses the notion that the free market can solve debilitating environmental degradation and climate change as nothing more than a political ghost emptied of its collective aspirations Decrying what she perceives as a failure of the human imagination and an impoverishment of political institutions Parr ruminates on the nature of change and existence in the absence of a future The sustainability movement she contends must engage more aggressively with the logic and cultural manifestations of consumer economics to take hold of a more transformative politics If the economically powerful continue to monopolize the meaning of environmental change she warns new and more promising collective solutions will fail to take root Shaping Rural Areas in Europe Luís Silva, Elisabete Figueiredo, 2013-06-17 Shaping Rural Areas in Europe

Perceptions and Outcomes on the Present and the Future sets out to investigate the effect of urban perceptions about the rural and consequent demands on rurality on the present and future configurations of rural territories in Europe in the early twenty first century This volume presents and discusses a broad range of case studies and theoretical and methodological approaches from different academic fields mainly Anthropology Sociology and Geography **Green Illusions** Ozzie Zehner, 2012 We don't have an energy crisis We have a consumption crisis And this book which takes aim at cherished assumptions regarding energy offers refreshingly straight talk about what's wrong with the way we think and talk about the

problem Though we generally believe we can solve environmental problems with more energy more solar cells wind turbines and biofuels alternative technologies come with their own side effects and limitations How for instance do solar cells cause harm Why can't engineers solve wind power's biggest obstacle Why won't contraception solve the problem of overpopulation lying at the heart of our concerns about energy and what will This practical environmentally informed and lucid book persuasively argues for a change of perspective If consumption is the problem as Ozzie Zehner suggests then we need to shift our focus from suspect alternative energies to improving social and political fundamentals walkable communities improved consumption enlightened governance and most notably women's rights The dozens of first steps he offers are surprisingly straightforward For instance he introduces a simple sticker that promises a greater impact than all of the nation's solar cells He uncovers why carbon taxes won't solve our energy challenges and presents two taxes that could Finally he explores how future environmentalists will focus on similarly fresh alternatives that are affordable clean and can actually improve our well being Watch a book trailer
