Successful Prevention and Youth Development Programs Laura Ferrer-Wreder, Håkan Stattin, Carolyn Cass Lorente, Jonathan G. Tubman, Lena Adamson, 2012-02-02 From a European Perspective This book charts territory that is profoundly important and yet rarely fully understood The authors have attempted a task that has relevance to the widest possible range of professionals working with children and adolescents In describing and assessing the fields prevention and promotion they have performed an immense service to researchers in this field but also to practitioners across the spectrum from mental health nurses and doctors to teachers and psychologists from social work professionals to psychiatrists and youth counselors There are two other key elements that should be emphasized from the outset The first is that the approach in this book is truly multi disciplinary with the authors making a genuine attempt to draw upon knowledge and practice derived from all the relevant disciplines The second element which makes this book so important is that the authors have worked across countries to ensure that work in the field of intervention from both North America and from Europe should be included This is as welcome as it is refreshing There appear to be so many barriers to true collaboration between the two continents and so many examples of either North American to what is going on across the or European social scientists appearing blind border that the approach taken here should be wholeheartedly commended This book is essentially a review but a rather special review Impact of Artificial Intelligence, and the Fourth Industrial Revolution on Business Success Bahaaeddin Alareeni, Allam Hamdan, 2022-07-29 This book constitutes the refereed proceedings of the International Conference on Business and Technology ICBT2021 organized by EuroMid Academy of Business Technology EMABT held in Istanbul between 06 07 November 2021 In response to the call for papers for ICBT2021 485 papers were submitted for presentation and inclusion in the proceedings of the conference After a careful blind refereeing process 292 papers were selected for inclusion in the conference proceedings from forty countries Each of these chapters was evaluated through an editorial board and each chapter was passed through a double blind peer review process The book highlights a range of topics in the fields of technology entrepreneurship business administration accounting and economics that can contribute to business development in countries such as learning machines artificial intelligence big data deep learning game based learning management information system accounting information system knowledge management entrepreneurship and social enterprise corporate social responsibility and sustainability business policy and strategic management international management and organizations organizational behavior and HRM operations management and logistics research controversial issues in management and organizations turnaround corporate entrepreneurship innovation legal issues business ethics and firm general accounting and firm financial affairs non traditional research and creative methodologies These proceedings are reflecting quality research contributing theoretical and practical implications for those who are wise to apply the technology within any business sector It is our hope that the contribution of this book proceedings will be of the
