and Teaching is one of five paperback books derived from the foundational two volume Oxford Handbook of Music Education. Designed for music teachers, students and scholars of music education as well as educational administrators and policy makers, this third volume in the set emphasizes the types of active musical attributes that are acquired when learning an instrument or to sing together with how these skills can be used when engaging musically with others. These chapters shed light on how the field of voice instruction has changed dramatically in recent decades and how physiological, acoustical, biomechanical, neuromuscular and psychological evidence is helping musicians and educators question traditional practices. The authors discuss research on instrumental learning demonstrating that there is no ideal way to learn but rather that a chosen learning approach must be appropriate for the context and desired aims. This volume rounds out with a focus on a wide range of perspectives dealing with group performance of instrumental music, an area that is organized and taught in many varied ways internationally.
