Murphy, 2012-09-14 This book looks at the symbolic side of globalization development and aging Many of the dimensions that are discussed represent updates of past debates but some are entirely new In particular globalization is accompanied by subtle social imagery that profoundly shapes the way institutions and identities are imagined The process of aging and persons sense of identity is no exception The underlying assumptions that pervade globalization inform how critical dimensions of aging are discussed and institutionalized The application of marketplace imagery for example may impact attempts for holism in how aging is studied and the prospects for human agency during the aging process This book offers a special look into how temporality technology normativity and empiricism structure the symbolic side of globalization and influence dominant images of the aging process Current debates about globalization and aging are expanded by helping readers see the social imagery that is both subtly behind globalization and at the forefront of shaping the aging experience Between Successful and Unsuccessful Ageing: Selected Aspects and Contexts Andrzej Klimczuk, Łukasz Tomczyk, 2020-01-15 We provide to readers the 11th volume of the Czech Polish Slovak Studies in Andragogy and Social Gerontology series We are delighted to announce that the presented study is the result of the work of scientists from seven countries Austria China Ghana Hungary Japan Poland and Russia This international collection of texts is part of the global discourse on the determinants of adult education and the functioning of people in late adulthood The 11th volume is a collection of research results that show both the positive and negative dimensions of ageing through the prism of research experience from various geographical and cultural areas The researchers invited to the presented volume tried to illustrate the issues assigned to the following topics ageing with dignity retirement age assumptions and conditions resulting from living in the home the relationship between challenges concerning life expectancy and needs care and ageing services and foundations and potential changes in pension systems The research results presented in this volume have a common denominator which is caring for the quality of life of the older people regardless of their place of residence Thus the study *Between Successful and Unsuccessful Ageing Selected Aspects and Contexts* brings new insights from scientists who scrupulously characterize the complexity of processes that affect the
