

How to Catch Crabs

The Ultimate Guide to Successful Crabbing

1

Learn the Regulations. In Canada, crab fishing is regulated by the Department of Fisheries and Oceans (DFO). Before you head out, it's crucial to familiarize yourself with these regulations to avoid inadvertently breaking the law.

2

Get the Right Gear. Your gear will depend on the method of crabbing you choose, and it may include hand lines, crab traps or pots, crab gauges, protective gloves, and a bucket or cooler. Local regulations may also govern the type of gear you can use, so always ensure your gear is compliant.

3

Choose the Best Bait. The bait you use can significantly impact your crabbing success. Crabs are particularly attracted to strong-smelling meats like fish heads, chicken necks, or squid. Make sure your bait is fresh and well-secured in your trap to prevent the crabs from snatching it and escaping.

4

Master the Art of Baiting. While crabs are attracted to the scent of your bait, how you present it can make a significant difference. Securing the bait, positioning the bait in the center of the trap, and regularly replacing bait for freshness are some good strategies to start with.

5

Location is Key. Where you set your traps is critical for successful crabbing. Different types of crab prefer different environments, so consider where you're crabbing and the types of crabs that reside in the area.

6

Tide Timing. Crabs are more active during certain parts of the tide cycle. By understanding the tide timings and its effects on crab behavior, you can optimize your crabbing times to coincide with their most active periods.

7

Check Traps Regularly. The frequency with which you should check your traps can vary based on regulations, your type of trap, and the time of day. By checking your traps regularly, you can also replace the bait more frequently, which can increase your catch.

8

Handle Crabs Carefully. Handling crabs requires caution. Remember to approach them from the rear to avoid the pincers and handle them using protective gloves. Once you've caught a crab, keep it in a cool, moist environment, like a bucket or cooler, until you're ready to cook or process it.

9

Practice Conservation. Conservation is an important part of crabbing. Always remember to follow size, gender, and catch limit regulations and use gear that minimizes bycatch and harm to other marine species.

10

Prepare for the Weather. Canada's coastal weather can be unpredictable. Dress in layers to allow you to adjust to changing temperatures, and be sure to wear sun protection despite seemingly cloudy days.
