Davis,2016-11-08 Without mincing words it is important that parents know that each child is unique and precious and by that I means that a parent must first and foremost consider the aftermath of potty training on a child s emotional stability by first sourcing for and digesting the right information before embarking on this task Yes the appropriate or finest information regarding potty training must be done in a way that we as parents also have to put into consideration its impact on each child s emotion and that done in the right perspective This is because the human body systems are unknown to children however they learn to control all of the leaks which come out from the body without consciousness as time goes on yes leaks like saliva urine and dribbling and every other thing that comes out of the body system However I am not an advocate of rush that is so rampant these days which put the children to stress I mean I don t totally support the view of potty training a child in a day in three days or in a weekend as the case may be Though I am going to discuss it in the next chapter I will like to say here that I do not have confidence in imposing an adult view of potty training on kids and there is nothing like a bad job or an excellent job when it comes to potty training Now to be upfront with you I want you to know every achievement require hard work and it is our responsibility as parents to do the needful in training our kids for the next major feat in a civilized human society which is the ability to control the way to go about moving one s bowel as well as emptying one s bladder Okay I guess it is time you go and get your copy of this Potty Training Book For Parents The Ultimate Potty Training Tips to Everything You Need to Know About Potty Training for Parents and Potty Training In a Day Yes and you can start gathering all the information you need to implement a successful potty training routine for your toddler today Just click on the buy button above to get your copy today
