Pountain, Bozena Wislocka Breit, 2021-09-07 New worlds for old words Mundos nuevos para viejas palabras is a collection of chapters on the theme of lexical borrowing in the languages of Western Europe with particular focus on borrowing from Latin or from Greek via Latin into Spanish Such cultured or learned borrowing as it has sometimes been designated is an especially intriguing feature of the Romance languages since they also derive from Latin It is also of particular interest to historical linguists since it is an example of what has been called change from above innovation first evidenced in the written usage of the culturally elite which then diffuses into more general

acceptance with the result that some cultured borrowings e g problem problema social program me programa are now amongst the most common words in the modern languages Despite their enormous influence on such major languages as English Spanish Portuguese French and Italian the mechanisms by which these borrowings become established in their host languages have to date been relatively little studied This book seeks to make a contribution to this question and revive interest in what has become a neglected area of historical linguistics and contains contributions both by internationally respected scholars and new researchers in the field This bilingual collection will appeal to academics scholars and postgraduate students of Hispanic Studies Cultural History and particularly Historical Linguistics and Romance Linguistics
