Temple Of Eternity The Thomas Trahernes Philosophy Of Time

Cassandra Gorman

Temple Of Eternity The Thomas Traherne's Philosophy Of Time:

Thomas Traherne and Seventeenth-century Thought Elizabeth S. Dodd, Cassandra Gorman, 2016 New essays on Thomas Traherne challenge traditional critical readings of the poet Boundless Innocence in Thomas Traherne's Poetic Theology Elizabeth S. Dodd, 2016-03-16 The seventeenth century poet and divine Thomas Traherne finds innocence in every stage of existence He finds it in the chaos at the origins of creation as well as in the blessed order of Eden He finds it in the activities of grace and the hope of glory but also in the trials of misery and even in the abyss of the Fall Boundless Innocence in Thomas Traherne's Poetic Theology traces innocence through Traherne's works as it transgresses the boundaries of the estates of the soul Using grammatical and literary categories it explores various aspects of his poetic theology of innocence uncovering the boundless desire which is embodied in the yearning cry Were all Men Wise and Innocent Recovering and reinterpreting a key but increasingly neglected theme in Traherne's poetic theology this book addresses fundamental misconceptions of the meaning of innocence in his work Through a contextual and theological approach it indicates the unexplored richness complexity and diversity of this theme in the history of literature and theology **The Temple of Eternity** Richard Douglas Jordan, 1972 Thomas Traherne Malcolm M. Day, 1982 **John Donne and the Metaphysical Poets** Harold Bloom, 2010 Presents a collection of critical essays about the works of John Donne and other metaphysical poets The Time Dimension T K. Das, 1990-04-17 This is the first comprehensive bibliography of temporal scholarship research on the subject of time and the phenomenon of time itself As the author notes in his introduction the nature of research insights on the subject of time is difficult to comprehend within the confines of any specific discipline since relevant materials are scattered throughout the literature in numerous scholarly fields By bringing together the most significant published works in a wide variety of disciplines this unique compendium enables scholars and researchers to look beyond their own particular area of expertise when selecting appropriate resource materials Throughout the focus is on the time dimension itself as a problematic or researchable phenomenon rather than on narrow topics such as time management time series analysis or forecasting Organized by discipline the work begins with an initial chapter that lists general works on the time dimension Nineteen chapters then list works in particular disciplines ranging from anthropology and culture to biology economics futures studies history linguistics management studies psychology and more The final chapter lists miscellaneous entries which could not be categorized into any of the specific disciplinary headings Within each chapter entries are arranged alphabetically by author or editor Nearly all sources are from scholarly journals and books **The Atom in Seventeenth-century Poetry** Cassandra Gorman, 2021 An investigation into the remarkable poetics of the atom in English literary texts from the mid to late seventeenth century The early modern atom understood as an indivisible particle of matter captured the poetic imagination in ways that extended far beyond the reception of Lucretius and Epicurean atomism Contrarily to fears of atomisation and materialist threat many poets and philosophers of the period sought positive spiritual

motivation in the concept of material indivisibility This book traces the metaphysical import of these poetic atoms teasing out an affinity between poetic and atomic forms in seventeenth century texts In the writings of Henry More Thomas Traherne Margaret Cavendish Hester Pulter and Lucy Hutchinson both atoms and poems were instrumental in acts of creating ordering and reconstructing knowledge Their poems emerge as exquisitely self conscious atomic forms producing intimate reflections on the creative power and indivisibility of self soul and God The book begins with a survey of the imaginative possibilities surrounding the early modern atom before considering the indivisible centres of the Cambridge Platonist Henry More s cosmic Spenserian poetics The focus then turns to the lyrical bond formed between atom and soul in the writings of Thomas Traherne and from there to the experimental sequences of Margaret Cavendish and Hester Pulter whose poetic spaces create new worlds and imagine alternative lives The book concludes with a study of Lucy Hutchinson s creation poem Order and Disorder which anticipates the regeneration of fallen being in atomic and alchemical terms **The Ghost of**

Shakespeare Anna Frajlich, 2020-11-24 This volume collects the critical prose of award winning writer Anna Frajlich The Ghost of Shakespeare takes its name from Frajlich s essay on Nobel Prize laureate Wis awa Szymborska but informs her approach as a comparativist more generally as she considers the work of major Polish writers of the twentieth century including Zbigniew Herbert Czes aw Mi osz and Bruno Schulz Frajlich s study of the Roman theme in Russian Symbolism owes its origins to her stay in the Eternal City the second stop on her exile from Poland in 1969 The book concludes with autobiographical essays that describe her parents dramatic flight from Poland at the outbreak of the war her own exile from Poland in 1969 settling in New York City and building her career as a scholar and leading poet of her generation

Centuries' Ends, Narrative Means Interdisciplinary Group for Historical Literary Study, 1996 This pathbreaking work uses the approaching conclusion of the second millennium as a context for discussing questions concerning temporal division and narrative continuity It investigates assumptions about teleology and eschatology while exploring the ways in which temporal division affects the creation and production of cultural texts and reciprocally the ways in which narrative techniques forms and conventions shape explain and justify history Through this exploration the volume examines how temporal thresholds tend simultaneously to reinforce and to disrupt conceptual boundaries The sixteen essays use the significance typically invested in historical junctures marked by a centenary advance to investigate perceived paradigm shifts and the consequent reactions to these implicit and explicit transitions By doing so they also seek to illuminate the relations between narrative and history and to enhance understanding of our present historical moment **Infinity, Faith, and**

Time John Spencer Hill, 1997-11-26 In Part 1 Hill examines the effect of the idea of spatial infinity on seventeenth century literature arguing that the metaphysical cosmology of Nicholas of Cusa provided Renaissance writers such as Pascal Traherne and Milton with a way to construe the vastness of space as the symbol of human spiritual potential Focusing on time in Part 2 Hill reveals that faced with the inexorability of time Christian humanists turned to St Augustine to develop a

philosophy that interpreted temporal passage as the necessary condition of experience without making it the essence or ultimate measure of human purpose Hill's analysis centres on Shakespeare whose experiments with the shapes of time comprise a gallery of heuristic time centred fictions that attempt to explain the consequences of human existence in time Infinity Faith and Time reveals that the sixteenth and seventeenth centuries were a period during which individuals were able with more success than in later times to make room for new ideas without rejecting old beliefs
