Temporal Geographical Information Systems Advanced Functions For Fieldbased Applications:

Temporal GIS George Christakos, Patrick Bogaert, Marc Serre, 2002-01-11 CD ROM contains BMElib a set of programs for spatiotemporal geostatistics in Temporal GIS written in MatLab version 5.3 and later

Temporal GIS George Christakos, Patrick Bogaert, Marc Serre, 2012-12-06 The book focuses on the development of advanced functions for field based temporal geographical information systems TGIS. These fields describe natural epidemiological, economical and social phenomena distributed across space and time. The book is organized around four main themes: Concepts, mathematical tools, computer programs and applications. Chapters I and II review the conceptual framework of the modern TGIS and introduce the fundamental ideas of spatiotemporal modelling. Chapter III discusses issues of knowledge synthesis and integration. Chapter IV presents state of the art mathematical tools of spatiotemporal mapping. Links between existing TGIS techniques and the modern Bayesian maximum entropy BME method offer significant improvements in the advanced TGIS functions. Comparisons are made between the proposed functions and various other techniques e.g. Kriging and Kalman-Bucy filters. Chapter V analyzes the interpretive features of the advanced TGIS functions, establishing correspondence between the natural system and the formal mathematics which describe it. In Chapters IV and V one can also find interesting extensions of TGIS functions e.g. non-Bayesian connectives and Fisher information measures. Chapters VI and VII familiarize the reader with the TGIS toolbox and the associated library of comprehensive computer programs. Chapter VIII discusses important applications of TGIS in the context of scientific hypothesis testing, explanation and decision making.

Encyclopedia of GIS Shashi Shekhar, Hui Xiong, 2007-12-12 The Encyclopedia of GIS provides a comprehensive and authoritative guide contributed by experts and peer reviewed for accuracy and alphabetically arranged for convenient access.
