Tequila A Natural And Cultural History:

Tequila Ana Guadalupe Valenzuela Zapata, Gary Paul Nabhan, 2003 This comprehensive guide to tequila's varieties, production and history shares marks of distinction for connoisseurs and highlights the link between artisanal agave cultivation and final flavor, arguing for a return to cultivation of heritage crops

Tequila Ana G. Valenzuela-Zapata, Gary Paul Nabhan, 2004-03-01 The array of bottles is impressive; their contents finely tuned to varied tastes. But they all share the same roots in Mesoamerica's natural bounty and human culture. The drink is tequila, more properly mescal de tequila, the first mescal to be codified and recognized by its geographic origin and the only one known internationally by that name. In *Tequila: A Natural and Cultural History*, Ana G. Valenzuela Zapata, the leading agronomist in Mexico's tequila industry, and Gary Paul Nabhan, one of America's most respected ethnobotanists, plumb the myth of tequila as they introduce the natural history, economics, and cultural significance of the plants cultivated for its production. Valenzuela Zapata and Nabhan take you into the agave fields of Mexico to convey their passion for the century plant and its popular by-product. In the labor-intensive business of producing quality mescal, the cultivation of tequila azul is maintained through traditional techniques passed down over generations. They tell how jimadores seek out the mature agaves, strip the leaves, and remove the heavy heads from the field; then they reveal how the roasting and fermentation process brings out the flavors that cosmopolitan palates crave. Today in Oaxaca, it's not unusual to find small-scale mescal makers vending their wares in the market plaza, while in Jalisco, the scale of distillation facilities found near the town of Tequila would be unrecognizable to old Jose Cuervo. Valenzuela Zapata and Nabhan trace tequila's progress from its modest beginnings to one of the world's favored spirits, tell how innovations from cross-cultural exchanges made fortunes for Cuervo and other distillers, and explain how the meteoric rise in tequila prices is due to an epidemic one they predicted would occur, linked to the industry's cultivation of just one type of agave. The tequila industry today markets more than four hundred distinct products through a variety of strategies that heighten the liquor's mystique, and this book will educate readers about the grades of tequila, from blanco to añejo, and marks of distinction for connoisseurs who pay up to two thousand dollars for a bottle. *Tequila: A Natural and Cultural History* will feed anyone's passion for the gift of the blue agave as it heightens their appreciation for its rich heritage.

The Oxford Companion to Spirits and Cocktails David Wondrich, Noah Rothbaum, 2021-10-20 The Oxford Companion to Spirits and Cocktails presents an in-depth exploration of the world of spirits and cocktails in a ground-breaking synthesis. The Companion covers drinks, processes, and techniques around the world, as well as those in the US and Europe. It provides clear explanations of the different ways that spirits are produced, including fermentation, distillation, and ageing, alongside a wealth of new detail on the emergence of cocktails and cocktail bars, including entries on key cocktails and influential mixologists and cocktail bars.

A Cultural History of Food in the Modern Age Amy Bentley, 2014-05-22 In the modern age, 1920-2000, vast technological innovation spurred greater concentration, standardization, and globalization of the food supply. As advances in

agricultural production in the post World War II era propelled population growth a significant portion of the population gained access to cheap industrially produced food while significant numbers remained mired in hunger and malnutrition Further as globalization allowed unprecedented access to foods from all parts of the globe it also hastened environmental degradation contributed to poor health and remained a key element in global politics economics and culture A Cultural History of Food in the Modern Age presents an overview of the period with essays on food production food systems food security safety and crises food and politics eating out professional cooking kitchens and service work family and domesticity body and soul representations of food and developments in food production and consumption globally **The Cultural**

Status of Pollinators in North America National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Board on Life Sciences, Committee on the Status of Pollinators in North America, 2007-04-13 Pollinators insects birds bats and other animals that carry pollen from the male to the female parts of flowers for plant

reproduction are an essential part of natural and agricultural ecosystems throughout North America. For example, most fruit, vegetable, and seed crops and some crops that provide fiber, drugs, and fuel depend on animals for pollination. This report provides evidence for the decline of some pollinator species in North America, including America's most important managed pollinator, the honey bee, as well as some butterflies, bats, and hummingbirds. For most managed and wild pollinator species, however, population trends have not been assessed because populations have not been monitored over time. In addition, for wild species with demonstrated declines, it is often difficult to determine the causes or consequences of their decline. This report outlines priorities for research and monitoring that are needed to improve information on the status of pollinators and establishes a framework for conservation and restoration of pollinator species and communities.

Farming and the Fate of Wild Nature Dan Imhoff, Jo Ann Baumgartner, 2006. Farming and the Fate of Wild Nature addresses an urgent and complex issue facing communities and cultures throughout the world: the need for heightened land stewardship and conservation in an era of diminishing natural resources. Agricultural lands in rural areas are being purchased for development. Water scarcities are pitting urban and development expansion against agriculture and conservation needs. The farming population is ageing and retiring, while those who remain struggle against low commodity prices, international competition, rising production costs, and the threat of disappearing subsidies. We are living amidst a major extinction crisis, much of it driven by agriculture as well as an increasing shift toward a global urban populace. The modern diet, driven by a grain-fed livestock industry, is no longer connected with the ecosystems that support it. In international circles, experts are arguing that further intensification of agriculture through industrialization and genetic modification will be necessary to both feed an exploding human population and to save what is left of wild biodiversity. This book takes up where its predecessor, the award-winning *Farming with the Wild*, left off. Featuring a wide range of in-depth essays, articles, and other materials by such authors as Aldo Leopold, Wendell Berry, Michael Pollan, Fred Kirschenmann, and Daniel Imhoff, this book persuasively demonstrates that farm and ranch operations which coexist with wild nature are necessary to sustain biodiversity and beauty on the landscape. In fact, as this invaluable educational resource demonstrates, they are essential in the challenge of building sane, healthy, and hopeful human societies.
