future security that focuses on people's basic needs is sensitive to Asian nationalism and gradually replaces military power with developmental priorities. With its concise appraisals of the security policies of the United States, China, Japan, the two Koreas, and the ASEAN countries, this work will be a valued reference for policymakers, scholars, and students alike. **China and the Arms Trade** Anne Gilks, Gerald Segal, 2023-03-24. First Published in 1985. China and the Arms Trade offers a detailed analysis of Chinese arms aid policy to examine Beijing's changing nature of foreign and domestic policy. Military aid like war is a continuation of foreign policy by other means. The previous perception of China offering special and selfless military assistance seems no longer accurate. The nature of these Chinese aid now appears more complex and contradictory. China now like other great powers take an active role in the lucrative international arms bazaar. As one Chinese official said about his country's more hard-headed arms sales policy, we cannot sell at friendship prices all the time. This book is a must read for scholars and researchers of Chinese foreign policy, strategic studies, Chinese politics, international relations, and defence studies. **The Arms Race in Asia** Andrew T.H. Tan, 2013-12-13. This book is the first systematic examination of the emerging arms race in Asia. The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East, the two largest arms export markets in the world. Of these two regions, Asia has become particularly significant, led by the emergence of China and India as major powers. It is therefore not surprising that the rapid military modernisation in Asia, accompanied by significant increases in the size and sophistication of armed forces, has generated attention as to its trends, key characteristics, causes, and implications. This phenomenon, which has become evident since the end of the Cold War, has also been widely described as an Asian arms race. This book evaluates the key conceptual ideas which can shed light on this phenomenon, as well as examining the complex mix of internal, external, and technological factors that have led to its emergence. The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape: a loose bloc of US allies in the region, a counter bloc of potential US adversaries, and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments. The Arms Race in Asia concludes that if the emerging arms race is left unchecked, it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars. The book will be of great interest to students of Asian politics, strategic studies, defence studies, security studies, and IR in general. *Encyclopedia of Violence, Peace, and Conflict*, 1999-08-16. The Encyclopedia of Violence, Peace, and Conflict, a three-volume set written by more than 200 eminent contributors from around the world, takes advantage of increasing worldwide awareness in the public, private, commercial, and academic sectors about manifestations of violence in all segments of society. While the contributors do not use these volumes to make specific arguments, they do describe and clarify the developments in thought that have led to current theories about and positions on violence and peace. Our reviewers consistently note that while many in-depth studies of war, peace, and aggression exist, the attendant specialization keeps scholars from learning about related fields. No

publication competing with the Encyclopedia of Violence Peace and Conflict can satisfy their need for a vast introductory work to such a diverse and socially important field This major work includes more than 190 multidisciplinary articles with over 1 000 cross references and more than 2 000 bibliography entries for further reading which are arranged alphabetically for easy access More than 190 multidisciplinary articles with over 1 000 cross references Article outline and glossary of key terms begin each article Entries arranged alphabetically for easy access Three volume set with subject index of over 750 entries Articles written by more than 200 eminent contributors from around the world *Military Expansion, Economic Decline* R.W. DeGrasse, 2016-07-01

By assessing the costs and benefits of military spending the authors provide a second opinion on the subject of military economics While advocates of increased military spending often stress the positive effects of the Pentagon on the economy there has been little systematic summary of the opportunity costs that society pays for a large military establishment This book fills that gap *The Structure of the Defense Industry* Nicole Ball, Milton

Leitenberg, 2021-05-30 Proponents of arms control and disarmament are often confronted with the argument that reductions in defense expenditure lead to cutbacks in military industries and thus to economic hardship While a reduction in defense production would cause some economic dislocation this would be mitigated by the ability of the economy to adapt to changing patterns of production This book first published in 1983 assesses the likely effects of reductions in defense industries by an examination of the roles these industries play in national economies Each chapter discusses industry employment output research and development capital value profitability concentration and competition internal organization and regional employment concentration Other questions considered include the economic importance of weapons exports the defense industry as a leading edge in maintaining national technological capabilities and the reliance of individual firms on defense contracting *The International Arms Trade* Rachel Stohl, Suzette Grillot, 2013-04-29

Daalder, Terry Terriff, 2014-02-04 Rethinking the Unthinkable examines the future direction of nuclear arms control in the post Cold War security environment Believing that the new environment requires a radical rethinking of the purpose and role of nuclear weapons in international politics the contributors address many fundamental issues influencing further US Russian and European nuclear arms reductions This volume is a product of the Project on Rethinking Arms Control sponsored by the Center for International and Security Studies in Maryland      *Big Business and Dictatorships in Latin America* Victoria Basualdo, Hartmut Berghoff, Marcelo Bucheli, 2020-12-04 This edited volume studies the relationship between big business and the Latin American dictatorial regimes during the Cold War The first section provides a general background about the contemporary history of business corporations and dictatorships in the twentieth century at the international level The second section comprises chapters that analyze five national cases Argentina Brazil Chile Uruguay and Peru as well as a comparative analysis of the banking sector in the Southern Cone Argentina Brazil
