law But what is the state role and relevance of public international law in today's complex and highly dynamic global security environment Which concepts of security are anchored in international law How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks The Oxford Handbook of the International Law of Global Security provides a ground breaking overview of the relationship between international law and global security It constitutes a comprehensive and systematic mapping of the various sub fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area

Managing Intercollective Conflict Anna J. Borgeryd, 1999-02 How does the state system measure up to today's realities when it comes to managing conflict To what extent are efforts to manage conflict successful and for whom Prevailing structures designed to deal with conflict between collectives sovereign states supported by militaries military industry and the United Nations operate mainly on principles that are hundreds of years old Conditions for conflict and its management have changed radically since this state system was constructed There is a risk that institutional inertia produces growing disparity between real world problems and the institutions that are supposed to manage them Realism and legalism are found to form a double ideological support for the state system The study compares the state system's realist and legalist premises to different cases of post cold war intercollective conflict the 1990-91 Gulf War the 1990-95 break up of Yugoslavia and the 1992 Los Angeles riots These cases present important challenges to the prevailing system's premises mismatches between idea and reality that are clearly connected to failures in conflict management In addition findings suggest that the state system not only fails to deal with important aspects of modern day conflict but that it increasingly produces problems that it cannot manage This suggests that the prevailing state system is not in harmony with crucial conflict related aspects of global impact indicating a serious systemic problem

Paolini, Christian Reus-Smit, Anthony P. Jarvis, 2016-07-27 This book explores the nature and problems of global governance as we enter the next millennium It focuses on the United Nations the most ambitious experiment to date in multilateral management of world society Leading scholars policy makers and representatives of non governmental organizations examine the economic security and civil political dimensions of governance exploring the impact of changing global conditions on national regional and international institutions and processes of governance They use the experience of the United Nations system to illuminate the nature and

viability of sovereign and non sovereign forms of governance in an era of rapid political economic cultural strategic and ecological change *European Security* Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it Sea-Dumped Chemical Weapons: Aspects, Problems and Solutions A.V. Kaffka, 2013-03-09 This volume summarises the materials presented at the NATO Advanced Research Workshop on Sea Dumped Chemical Munitions held in Kaliningrad Moscow Region Russia in January 1995 The conference was sponsored by the NATO Division of Scientific and Environmental Affairs in the framework of its outreach programme to develop co operation between NATO member countries and the Cooperation Partner countries in the area of disarmament technologies The problem of the ecological threat posed by chemical weapons CW dumped in the seas after the Second World War deserves considerable international attention the amount of these weapons many of them having been captured from the German Army is assessed at more than three times as much as the total chemical arsenals reported by the United States and Russia They were disposed of in the shallow depths of North European seas areas of active fishing in close proximity to densely populated coastlines with no consideration of the long term consequences The highly toxic material have time and again showed up for instance when retrieved occasionally in the fishing nets attracting local media coverage only Nevertheless this issue has not yet been given adequate and comprehensive scientific analysis the sea disposed munitions are not covered by either the Chemical Weapons Convention or other arms control treaties In fact the problem has been

neglected for a long time on the international level Only recently were official data made available by the countries which admitted conducting dumping operations

Regional Conflicts James E. Goodby, 1995 This is the second volume of a two part study on international issues in the post cold war era Ten authors consider regional conflicts how relations among the great powers could be affected by such conflicts and how co operation among the leading nations especially Russia and the United States might influence the course of regional strife The end of the cold war closed one chapter in history the global struggle between the USA and USSR It has not brought an end to regional conflicts This volume analyses three broad categories of regional conflicts Countries in the developing world where US and Russian interests are more or less equally engaged Countries of special interest to one or more of the great powers and Countries where there is no overriding Russian or US national security interest The challenge to US Russian co operation is examined under the major headings of preventive diplomacy in an era of high technology dilemmas of US Russian security co operation and international security organizations as instruments for great power co operation

Treaty Compliance: Some Concerns and Remedies

The Markland Group, Canadian Council on International Law, 2024-01-15

The Markland Group is a Canadian non governmental organization founded in 1987 by Douglas Scott. It is composed of lawyers, academics and other professionals with a special interest in the compliance aspects of disarmament treaties. The Canadian Council on International Law was founded in 1972 to represent Canadian international law practitioners and academics and to facilitate and promote the study of international legal problems by scholars and professionals. These two organizations joined forces in March 1995 to conduct a workshop on compliance, a topic which they felt had received insufficient attention from the international legal community. Thirty eight experts from Canada, the United States and Great Britain were assembled for a series of meetings at the University of Toronto under the chairmanship of Walter Dorn and Christine Elwell. Five of the papers presented at the workshop have since been edited, expanded and updated for publication in this volume. The papers analyse compliance measures under various treaties, with particular attention being given to The Biological Weapons Convention, the Chemical Weapons Convention, the Nuclear Non Proliferation Treaty, Safeguards, Trade and Environment, Compliance Measures and International Humanitarian Law, Compliance and Enforcement Mechanisms and their potential impact on Arms Control and Disarmament Treaties. The Markland Group and the CCIL believe that the study of treaty compliance methodology is still in its infancy. The development of effective, reliable and acceptable compliance systems is imperative, particularly for treaties dealing with disarmament. It is hoped that this volume will provide an impetus for enhanced study of this crucial issue.
