Michael Church, 2015 *The Other Classical Musics* offers challenging new perspectives on classical music by presenting the history of fifteen parallel traditions. Winner of the Royal Philharmonic Society Music Award for Creative Communication 2015. There is a treasure trove of underappreciated music out there; this book will convince many to explore it. *The Economist*. What is classical music? This book answers the question in a manner never before attempted by presenting the history of fifteen parallel traditions of which Western classical music is just one. Each music is analysed in terms of its modes, scales and theory, its instruments, forms and aesthetic goals, its historical development, golden age and condition today, and the conventions governing its performance. The writers are leading ethnomusicologists and their approach is based on the belief that music is best understood in the context of the culture which gave rise to it. By including Mande and Uzbek, Tajik music plus North American jazz in addition to the better known styles of the Middle East, the Indian sub-continent, the Far East and South East Asia, this book offers challenging new perspectives on the word classical. It shows the extent to which most classical traditions are underpinned by improvisation and reveals the cognate origins of seemingly unrelated musics; it reflects the multifarious ways in which colonialism, migration and new technology have affected musical development and continue to do today. With specialist language kept to a minimum, it is designed to help both students and general readers to appreciate musical traditions which may be unfamiliar to them and to encounter the reality which lies behind that lazy adjective exotic.

*Music, Modernity, and Publicness in India* Tejaswi Niranjana, 2020-02-14

With the onset of modernity in twentieth-century India, new social arrangements gave rise to new forms of music-making. The musicians were no longer performing exclusively in the princely courts or in the private homes of the wealthy. Not only did the act of listening to and appreciating music change, it became an important feature of public life, thus influencing how modernity shaped itself. This volume attempts to study the connections between music and the creation of new ideas of publicness during the early twentieth century. How was music labelled as folk or classical? How did music come to play such a catalytic role in forming identities of nationhood, politics or ethnicity? And how did twentieth-century technologies of sound reproduction and commercial marketing contribute to changing notions of cultural distinction? Exploring these interdisciplinary questions across multiple languages, regions and musical genres, the essays provide fresh perspectives on the history of musicians and migration in colonial India, the formation of modern spaces of performance and the articulation of national as well as nationalist traditions.
