Unfolding Crisis in Assam's Tea Plantations Deepak K. Mishra, Vandana Upadhyay, Atul Sarma, 2014-03-21 As the Indian economy integrates into global circuits of production exchange and accumulation the burdens of adjustment are shared unequally by different sectors classes and regions This study unravels the livelihood strategies and living conditions of labour in the tea gardens of Assam The tea sector has been undergoing a crisis since the 1990s with stagnant production decline in exports and closures of many tea gardens leading to large scale retrenchments in the labour force Based on a detailed analysis of secondary data and primary field research the study examines the extent types and implications of inter generational occupational mobility or immobility among tea garden labourers in Assam In the process it reflects on how even a sector that had brought capital and labour from outside and contributed significantly to the country's export earnings failed to create dynamic growth linkages within the local economy The experience of the labour force in the Assam tea sector the authors argue is important for making sense not only of the development dynamics of the region but of the contradictory ways in which forces of globalisation and neo liberal reforms have been reshaping the worlds of labourers in the margins The book will be of interest to students and scholars of labour studies development studies management studies and studies of north east India as well as to policy makers and those in the tea industry
