Soviet Night Operations In World War II:

Soviet Night Operations in World War II Claude R. Sasso, 1982 Soviet Night Operations in World War II Claude Ronald Sasso, 1983 This study examines the extensive experiences of the Soviet Army as it struggled to master the night Driven by necessity to operate in the relative safety of darkness the Soviet Army in World War II learned to capitalize on night operations and to exploit that capability in its quest for victory over the German Army The Soviets have not forgotten that experience and since the war they have emphasized the advantages of night combat As they train for night operations they closely study the experiences of World War II in the belief that certain basic techniques and conditions of battle transcend time and the vagaries of technological change Soviet Night Operations in World War II (Leavenworth Papers, Number 6)., 1982 Surprise is a vital ingredient in conducting successful warfare As early as 500 B C the Chinese general Sun Tzu recognized this simple fact in his oft quoted treatise on the art of war Throughout history commanders have employed the darkness of night to gain surprise and to grasp the initiative from the hands of the enemy Yet while night operations have progressed from the nocturnal marches of Joshua and the exploits of Judas Maccabeus in biblical times to the more recent firefights in Vietnam and Afghanistan problems involving special night training control and manpower have more often than not dissuaded commanders from attempting large scale operations in the dark Night combat has frequently been the recourse of the inferior military force or as in World War II of the army seeking either to find some respite from air power or to reduce casualties in the face of great firepower Still despite the difficulties associated with conducting military operations at night military planners and leaders cannot escape one salient fact darkness is a double edged weapon and like terrain it favors the one who best uses it and hinders the one who does not **Soviet Night Operations in World War II** Claude Ronald Sasso, 1983 This study examines the extensive experiences of the Soviet Army as it struggled to master the night Driven by necessity to operate in the relative safety of darkness the Soviet Army in World War II learned to capitalize on night operations and to exploit that capability in its quest for victory over the German Army The Soviets have not forgotten that experience and since the war they have emphasized the advantages of night combat As they train for night operations they closely study the experiences of World War II in the belief that certain basic techniques and conditions of battle transcend time and the vagaries of technological change Leavenworth Papers, Number 6. Soviet Night Operations in World War II. C. R. Sasso, ARMY COMMAND AND GENERAL STAFF COLL FORT LEAVENWORTH KS COMBAT STUDIES INST., 1982 Night combat has frequently been the recourse of the inferior military force or as in World War II of the army seeking either to find some respite from air power or to reduce casualties in the face of great firepower Still despite the difficulties associated with conducting military operations at night military planners and leaders cannot escape one salient fact darkness is a double edged weapon During World War II the Soviets effectively exploited darkness in a variety of operations from withdrawal to pursuit As the war dragged on the Red Army relied increasingly on night operations and so

refined its abilities that it was able to progress from limited tactical missions by relatively small units to front level operations by armies with complex coordination and control Today Soviet military writers frequently discuss night operations as they do all operations with reference to their experiences in the Second World War They appear convinced as one Soviet general and historian has noted that their troops should be equally capable of operating both during the day and at night and that night operations have an urgent significance in modern warfare
