Russian and Soviet Health Care from an International Perspective Susan Grant, 2017-02-20 This collection compares Russian and Soviet medical workers physicians psychiatrists and nurses and examines them within an international framework that challenges traditional Western conceptions of professionalism and professionalization through exploring how these ideas developed amongst medical workers in Russia and the Soviet Union Ideology and everyday life are examined through analyses of medical practice while gender is assessed through the experience of women medical professionals and patients Cross national and entangled history is explored through the prism of health care with medical professionals crossing borders for a number of reasons to promote the principles and advancements of science and medicine internationally to serve altruistic purposes and support international health care initiatives and to escape persecution Chapters in this volume highlight the diversity of experiences of health care but also draw attention to the shared concerns and issues that make science and medicine the subject of international discussion *Socialism, Social Welfare and the Soviet Union* Vic George, Nicholas Manning, 2021-12-24 First published in 1980 Socialism Social Welfare and the Soviet Union examines the views of Marx Engels and Lenin on what constitutes a socialist form of provision of social security income education health and housing The authors discuss the implementation of these ideas in the Soviet Union since the 1917 Revolution in the context of economic and political development and describe the social services in the Soviet Union assessing the extent to which the original ideas have been matched by reality They also briefly survey the views of several East European academic writers on social policy outlining some distinctive features of social policy in the Eastern bloc The authors general conclusion is that the Soviet Union has made great progress in social policy provision from their research and from their visits in the course of writing this book they show that the social services of the Soviet Union are as good as and in some ways more comprehensive than those of Western Europe Equally important is their conclusion that a society in which the means of production and distribution are nationalised and which makes a full provision of social services is not necessarily a socialist society This book will appeal to students of sociology political science and area studies Russia and Eastern Europe, 1789-1985 Raymond Pearson, 1989 **Companion to Medicine in the Twentieth Century** Roger
