Sovietization Of Ukraine 1917-1923 The Communist Doctrine And Practice Of Selfdetermination:

The Sovietization of Ukraine, 1917-1923 Jurij Borys, 1980 [The Sovietization of Ukraine, 1917-1923](#) Jurij Borys, 1980 **The Right of Self-Determination of Peoples** Jörg Fisch, 2015-12-09 The right of self determination of peoples holds out the promise of sovereign statehood for all peoples and a domination free international order But it also harbors the danger of state fragmentation that can threaten international stability if claims of self determination lead to secessions Covering both the late eighteenth and early nineteenth century independence movements in the Americas and the twentieth century decolonization worldwide this book examines the conceptual and political history of the right of self determination of peoples It addresses the political contexts in which the right and concept were formulated and the practices developed to restrain its potentially anarchic character its inception in anti colonialism nationalism and the labor movement its instrumentalization at the end of the First World War in a formidable duel that Wilson lost to Lenin its abuse by Hitler the path after the Second World War to its recognition as a human right in 1966 and its continuing impact after decolonization

The Self-determination of Peoples Wolfgang F. Danspeckgruber, 2002 Focusing especially on the era since the Cold War political scientists other scholars and government officials examine both empirically and conceptually the causes and impacts of people striving for self determination and autonomy They consider the legal political administrative ethnic cultural economic and strategic dimensions and try to consider examples from all major regions Annotation c Book News Inc Portland OR booknews com **Total Wars and the Making of Modern Ukraine, 1914-1954** George O. Liber, 2016-01-01 Between 1914 and 1954 the Ukrainian speaking territories in East Central Europe suffered almost 15 million excess deaths as well as numerous large scale evacuations and forced population transfers These losses were the devastating consequences of the two world wars revolutions famines genocidal campaigns and purges that wracked Europe in the first half of the twentieth century and spread new ideas created new political and economic systems and crafted new identities In *Total Wars and the Making of Modern Ukraine 1914-1954* George O Liber argues that the continuous violence of the world wars and interwar years transformed the Ukrainian speaking population of East Central Europe into self conscious Ukrainians Wars mass killings and forced modernization drives made and re made Ukraine s boundaries institutionalized its national identities and pruned its population according to various state sponsored political racial and social ideologies In short the two world wars the Holodomor and the Holocaust played critical roles in forming today s Ukraine A landmark study of the terrifying scope and paradoxical consequences of mass violence in Europe s bloodlands Liber s book will transform our understanding of the entangled histories of Ukraine the USSR Germany and East Central Europe in the twentieth century *Rethinking the Russian Revolution as Historical Divide* Matthias Neumann, Andy Willimott, 2017-11-22 The Russian Revolution of 1917 has often been presented as a complete break with the past with everything which had gone before swept away and all aspects of politics economy and society reformed and made new Recently however historians have increasingly come to question this

view discovering that Tsarist Russia was much more entangled in the processes of modernisation and that the new regime contained much more continuity than has previously been acknowledged This book presents new research findings on a range of different aspects of Russian society both showing how there was much change before 1917 and much continuity afterwards and also going beyond this to show that the new Soviet regime established in the 1920s with its vision of the New Soviet Person was in fact based on a complicated mixture of new Soviet thinking and ideas developed before 1917 by a variety of non Bolshevik movements

The Paradox of Ukrainian Lviv Tarik Cyril Amar,2015-12-15 The Paradox of Ukrainian Lviv reveals the local and transnational forces behind the twentieth century transformation of Lviv into a Soviet and Ukrainian urban center Lviv s twentieth century history was marked by violence population changes and fundamental transformation ethnically linguistically and in terms of its residents self perception Against this background Tarik Cyril Amar explains a striking paradox Soviet rule which came to Lviv in ruthless Stalinist shape and lasted for half a century left behind the most Ukrainian version of the city in history In reconstructing this dramatically profound change Amar illuminates the historical background in present day identities and tensions within Ukraine
