Sowing Modernity:

Sowing Modernity Peter D. McClelland, 2018-09-05 Contrary to those who regard the economic transformation of the West as a gradual process spanning centuries Peter D McClelland claims the initial transformation of American agriculture was an unmistakable revolution He asks when a single crucial question was first directed persistently pervasively and systematically to farming practices Is there a better way McClelland surveys practices from crop rotation to livestock breeding with a particular focus on the change in implements used to produce small grains With wit and verve and an abundance of detail he demonstrates that the first great surge in inventive activity in agronomy in the United States took place following the War of 1812 much of it in a fifteen year period ending in 1830 Once questioning the status quo became the norm for producers on and off the farm according to McClelland the march to modernization was virtually assured With the aid of more than 270 illustrations many of them taken from contemporary sources McClelland describes this stunning transformation in a manner rarely found in the agricultural literature How primitive farming implements worked what their defects were and how they were initially redesigned are explained in a manner intelligible to the novice and yet offering analysis and information of special interest to the expert **The Rise of Western Power** Jonathan Daly, 2013-12-19 The West's history is one of extraordinary success no other region empire culture or civilization has left so powerful a mark upon the world The Rise of Western Power charts the West's achievements representative government the free enterprise system modern science and the rule of law as well as its misdeeds two frighteningly destructive World Wars the Holocaust imperialistic domination and the Atlantic slave trade Adopting a global perspective Jonathan Daly explores the contributions of other cultures and civilizations to the West's emergence Historical geographical and cultural factors all unfold in the narrative Adopting a thematic structure the book traces the rise of Western power through a series of revolutions social political technological military commercial and industrial among others The result is a clear and engaging introduction to the history of Western civilization **The Oxford Handbook of Agricultural History** Jeannie M. Wayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor **A Cultural History of Food in the Modern Age** Amy Bentley, 2014-05-22 In the modern age 1920 2000 vast technological innovation spurred greater concentration standardization and globalization of the food supply As advances in agricultural production in the post World War II era propelled population growth a significant portion of the population gained access to cheap industrially produced food while significant numbers remained mired in

hunger and malnutrition Further as globalization allowed unprecedented access to foods from all parts of the globe it also hastened environmental degradation contributed to poor health and remained a key element in global politics economics and culture A Cultural History of Food in the Modern Age presents an overview of the period with essays on food production food systems food security safety and crises food and politics eating out professional cooking kitchens and service work family and domesticity body and soul representations of food and developments in food production and consumption globally

Marjanen, 2012-08-30 This collection of essays explores the emergence of economic societies in the British Isles and their development into a European American and global reform movement in the eighteenth century Its fourteen contributions demonstrate the intellectual horizons and international networks of this widespread and influential phenomenon

Governing Animals Kimberly K. Smith, 2012-07-05 Governing Animals explores the role of the liberal state in protecting animal welfare Examining liberal concepts such as the social contract property rights and representation Kimberly K Smith argues that liberalism properly understood can recognize the moral status and social meaning of animals and provides guidance in fashioning animal policy

Making Machines of Animals Neal A. Knapp, 2023-05-09 The author tells the story of how two different groups of actors Chicago meatpackers and land grant university professors significantly influenced the trajectory of 20th century agriculture These actors worked in concert to exterminate scrub livestock in favor of a eugenics driven improved animal via their establishment of the Chicago International Livestock Exposition

The Land-Grant Colleges and the Reshaping of American Higher Education Roger L. Geiger, 2017-07-05 This work provides a critical reexamination of the origin and development of America's land grant colleges and universities created by the most important piece of legislation in higher education The story is divided into five parts that provide closer examinations of representative developments Part I describes the connection between agricultural research and American colleges Part II shows that the responsibility of defining and implementing the land grant act fell to the states which produced a variety of institutions in the nineteenth century Part III details the first phase of the conflict during the latter decades of the nineteenth century about whether land colleges were intended to be agricultural colleges or full academic institutions Part IV focuses on the fact that full fledged universities became dominant institutions of American higher education The final part shows that the land grant mission is alive and well in university colleges of agriculture and in fact is inherent to their identity Including some of the best minds the field has to offer this volume follows in the fine tradition of past books in Transaction's Perspectives on the History of Higher Education series

Down to Earth Ted Steinberg, 2002-05-09 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of our nation a history that for the first time places the environment at the very center of our story Written with exceptional clarity Down to Earth re envisions the story of America from the ground up It reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as
