Vakoch, 2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the benefit of others but with no immediate gain for themselves certainly seem to be altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe [Race, Aliens, and the U.S. Government in African American Science Fiction](#) Elisa Edwards, 2011 This thesis deals with contemporary African American science fiction It focuses on three texts by Derrick Bell Octavia Butler and Walter Mosley and examines the ways in which they convert the dominantly white SF genre By addressing non traditional issues such as racism racial boundaries and the politics of species these alien encounter stories demonstrate that it is not the intruders from outer space who are the real threat to U S society but their own white U S Government Thesis Series Master Research Vol 2 **Weekly World News**, 2005-02-07 Rooted in the creative success of over 30 years of supermarket tabloid publishing the *Weekly*

The Latinx Files Matthew David Goodwin, 2021-05-14. In *The Latinx Files* Matthew David Goodwin traces how Latinx science fiction writers are reclaiming the space alien from its xenophobic legacy in the science fiction genre. The book argues that the space alien is a vital Latinx figure preserving Latinx cultures by activating the myriad possible constructions of the space alien to represent race and migration in the popular imagination. The works discussed in this book, including those of H.G. Wells, Gloria Anzaldúa, Junot Díaz, and Andr M. Carrington, and many others, often explicitly reject the derogatory correlation of the space alien and Latinxs, while at other times they contain space aliens that function as a source of either enlightenment or horror for Latinx communities. Throughout this nuanced analysis, *The Latinx Files* demonstrates how the character of the space alien has been significant to Latinx communities and has great potential for future writers and artists.
