

THE SPACE ATLAS

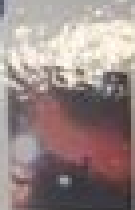

An indispensable guidebook to the universe filled with beautiful maps, striking photographs, and informative charts and diagrams

DISCOVER

which planet is the hottest - how the Moon was formed - what lies at the heart of a comet - what happens to a star when it dies - how astronomers found out that the universe is expanding

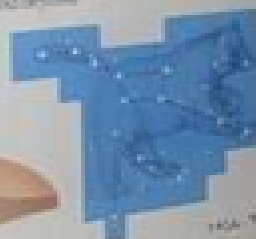

EXPLORE

the surfaces of the Sun, the planets, and their moons - a white dwarf, a red giant, and a black hole - the nebulae where stars and planets are born - the violent center of our Galaxy

LEARN

to identify the constellations - why the same side of the Moon always faces Earth - how astronomers measure star distances - about space missions to the edge of the Solar System and beyond

Space Atlas A Pictorial Guide To Our Universe

Melvin H. Schuetz

Space Atlas A Pictorial Guide To Our Universe:

NASA EP. United States. National Aeronautics and Space Administration, 1968 Astronomy Robin Kerrod, 1998

Provides and introduction to astronomy and includes projects such as making a sundial *Aerospace Bibliography*, 1970

The Hidden History of Earth Expansion Stephen W. Hurrell, 2020-05-14 For more than half a century the theory of continental drift was widely derided. Innovators developing the radical theory were labelled as unscientific by well known science authorities. But then in the space of a few years virtually all opposition dramatically collapsed. Continental drift transformed into plate tectonics and became widely acknowledged as one of the most profound scientific revolutions of the twentieth century. Yet a number of science innovators who had been closely involved with creating this new theory of the Earth continued to research an even more radical theory. They saw evidence that the new geological theory was incomplete, arguing that continental drift was caused by the Earth expanding in size. These science innovators give us a unique insight into their experiences. They relate their personal histories of Earth expansion in 14 original essays. *The Hidden History of Earth Expansion* presents the unique personal histories of British, American, Australian, German, Polish, Romanian, Indian, Albanian, and Jamaican science innovators as they strived to produce a modern theory of the Earth. It includes chapters expressly written for the book by some of the most well known researchers into Earth expansion: Hugh G. Owen, Cliff Ollier, Karl Heinz Jacob, James Maxlow, Jan Koziar, Stefan Cwojdzinski, Carl Strutinski, Stephen W. Hurrell, John B. Eichler, William C. Erickson, David Noel Zahid, A. Khan, Ram Chandra Tewari, Vedat Shehu, and Richard Guy. In addition to furnishing us with their personal histories of Earth expansion and the seemingly overwhelming evidence for its confirmation, the authors highlight areas where further research is required.

A Chesley Bonestell Space Art Chronology Melvin H. Schuetz, 1999 Chesley Bonestell has been called the Father of Space Art. His photorealistic paintings of the Moon and planets and other worlds beyond have awed us since they were first published over half a century ago. Moreover, he showed long before Gagarin or Glenn what it would be like for humans to explore the vastness of space. As author Howard E. McCurdy has written in his book *Space and the American Imagination*, "No artist had more impact on the emerging popular culture of space in America than Chesley Bonestell. Through his visual images he stimulated the interest of a generation of Americans and showed how space travel would be accomplished. Considering his great influence on both the public interest in space flight and the actual development of a national space program, it is therefore both surprising and unfortunate that heretofore there has not been available a bibliography documenting those places where Bonestell's art appeared in print. This book fills that void. Written in cooperation with the artist's widow and his estate managers, *A Chesley Bonestell Space Art Chronology* contains well over 700 entries and is the definitive reference guide to publications containing Bonestell's space art. In praise of it, the illustrator Vincent Di Fate says, "This entertaining and scholarly work is an invaluable and indispensable treasure for the vast legions of Bonestell's fans. Thoughtful, engrossing, and utterly thorough, it provides the cosmic ride of a lifetime."
