Department of the Army, 1962 *Missiles and Ventures Into Space* United States. Department of the Army, 1962 The Future of War Lawrence Freedman, 2017-10-10 An award winning military historian professor and political adviser delivers the definitive story of warfare in all its guises and applications showing what has driven and continues to drive this uniquely human form of political violence Questions about the future of war are a regular feature of political debate strategic analysis and popular fiction Where should we look for new dangers What cunning plans might an aggressor have in mind What are the best forms of defense How might peace be preserved or conflict resolved From the French rout at Sedan in 1870 to the relentless contemporary insurgencies in Iraq and Afghanistan Lawrence Freedman a world renowned military thinker reveals how most claims from the military futurists are wrong But they remain influential nonetheless Freedman shows how those who have imagined future war have often had an idealized notion of it as confined brief and decisive and have regularly taken insufficient account of the possibility of long wars hence the stubborn persistence of the idea of a knockout blow whether through a dashing land offensive nuclear first strike or cyberattack He also notes the lack of attention paid to civil wars until the West began to intervene in them during the 1990s and how the boundaries between peace and war between the military the civilian and the criminal are becoming increasingly blurred Freedman s account of a century and a half of warfare and the often misconceived thinking that precedes war is a challenge to hawks and doves alike and puts current strategic thinking into a bracing historical perspective Science Fiction - The Evolutionary Mythology of the Future Thomas Lombardo, 2018-12-14 An evolutionary and transformative journey through the history of science fiction from the innermost passions and dreams of the human spirit to the farthest reaches of the universe human imagination and beyond *China's Quantum Leap - Shaping the Future in the Aftermath of World War III* Jeffery Lewis Jr , 2024-03-27 China Winning World War III A Speculative Exploration by Jeffery Lewis Jr is a riveting foray into the not so distant future where the advent of World War IV radically transforms global dynamics Drawing from over 25 years of experience as a Department of Defense contractor with extensive time in Iraq and Afghanistan Lewis crafts a meticulously detailed speculative narrative that plunges readers into a world reshaped by advanced technology
