Architecture and Modernity Hilde Heynen, 2000-02-28 Bridges the gap between the history and theory of twentieth century architecture and cultural theories of modernity In this exploration of the relationship between modernity dwelling and architecture Hilde Heynen attempts to bridge the gap between the discourse of the modern movement and cultural theories of modernity On one hand she discusses architecture from the perspective of critical theory and on the other she modifies positions within critical theory by linking them with architecture She assesses architecture as a cultural field that structures daily life and that embodies major contradictions inherent in modernity arguing that architecture nonetheless has a certain capacity to adopt a critical stance vis vis modernity Besides presenting a theoretical discussion of the relation between architecture modernity and dwelling the book provides architectural students with an introduction to the discourse of critical theory The subchapters on Walter Benjamin Ernst Bloch Theodor Adorno and the Venice School Tafuri Dal Co Cacciari can be studied independently for this purpose

The Architecture of Space-Time in the Novels of Jane Austen Ruta Baublyté Kaufmann, 2018-07-05 This book argues that there are recurrent spatiotemporal patterns and structures in six Jane Austen novels which constitute a source of enduring if unconscious pleasure More precisely the book contends that there are overlapping natural and cultural cycles which co exist in a constantly transmuting space time and which are counterpointed with the linearity of pivotal events that drive the plot forwards This work examines the psychological relations to these space time patterns of the characters principally the heroines focusing on the transformations of their emotional states which prompt linear leaps

Changing Ideals in Modern Architecture, 1750-1950 Peter Collins, 1998 *Changing Ideals in Modern Architecture* revolutionized the understanding of modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of Western intellectual history This new edition of Peter Collins s ground breaking study includes all seventy two illustrations of the original hard cover edition which has been out of print since 1967 and restores the large format

The Theory of Architecture Paul-Alan Johnson, 1994-04-18 The Theory of Architecture

Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text
