Privatizing Space Giuseppe De Chiara, Davide Sivoletta, 2025-10-01 This book is a fast-paced account supported by striking compelling renderings of how spaceflight has been forever changed since NASA heralded the Commercial Orbital Transportation Services (COTS) program on January 18th 2006. Spaceflight was once a clunky affair ruled by inefficient cost-plus models that gravely hampered the rapid pace of innovation while extorting a tremendous ransom to the taxpayers. In a single volume you will embark on a thrilling journey of how major and lesser-known launcher and spacecraft manufacturers have devoted their resources to bring forward a vision of profit by rapid innovation offering transportation services from LEO through cis-lunar space and beyond Earth's sphere of influence. This book recognizes NASA's COTS program as a pivot point in the history of the space agency and worldwide space industry and charts two story arcs: before COTS and after COTS. The reader will understand how much the space industry has benefitted from the introduction of COTS in the pursuit of making humankind a spacefaring civilization. This book will feature numerous stunning original illustrations, cross-sections, close-up views, and many more meticulously crafted by renowned space artist Giuseppe De Chiara. As the saying goes, a picture is worth a thousand words, and these stunning images will capture the reader offering an exclusive intellectual experience.
