Contemporary Urban Landscapes of the Middle East Mohammad Gharipour, 2016-03-17 The Middle East is well known for its historic gardens that have developed over more than two millenniums The role of urban landscape projects in Middle Eastern cities has grown in prominence with a gradual shift in emphasis from gardens for the private sphere to an increasingly public function The contemporary landscape projects either designed as public plazas or public parks have played a significant role in transferring the modern Middle Eastern cities to a new era and also in transforming to a newly shaped social culture in which the public has a voice This book considers what ties these projects to their historical context and what regional and local elements and concepts have been used in their design Transnational Architecture and Urbanism Davide Ponzini, 2020-05-28 Transnational Architecture and Urbanism combines urban planning design policy and geography studies to offer place based and project oriented insight into relevant case studies of urban transformation in Europe North America Asia and the Middle East Since the 1990s increasingly multinational modes of design have arisen especially concerning prominent buildings and places Traditional planning and design disciplines have proven to have limited comprehension of and little grip on such transformations Public and scholarly discussions argue that these projects and transformations derive from socioeconomic political cultural trends or conditions of globalization The author suggests that general urban theories are relevant as background but of limited efficacy when dealing with such context bound projects and policies This book critically investigates emerging problematic issues such as the spectacularization of the urban environment the decontextualization of design practice and the global circulation of plans and projects The book portends new conceptualizations evidence based explanations and practical understanding for architects planners and policy makers to critically learn from practice to cope with these transnational issues and to put better planning in place
