Background Noise, Second Edition Brandon LaBelle, 2015-01-29 Background Noise follows the development of sound as an artistic medium and illustrates how sound is put to use within modes of composition installation and performance While chronological in its structure Brandon LaBelle's book is informed by spatial thinking weaving architecture environments and the specifics of location into the work of sound with the aim of formulating an expansive history and understanding of sound art At its center the book presupposes an intrinsic relation between sound and its location galvanizing acoustics sound phenomena and the environmental with the tensions inherent in what LaBelle identifies as sound's relational dynamic For the author this is embedded within sound's tendency to become public expressed in its ability to travel distances foster cultural expression and define spaces while being radically flexible This second expanded edition includes a new chapter on the non human and subnatural tendencies in sound art revisions to the text as well as a new preface by the author Intersecting material analysis with theoretical frameworks spanning art and architectural theory performance studies and media theory Background Noise makes the case that sound and sound art are central to understandings of contemporary culture

The Meaning of Modern Architecture Hans Rudolf Morgenthauer, 2016-03-09 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings This method was first developed as scholars realized that the new abstract art appearing needed to be analysed differently than the previous figurative works Since architecture experienced a similar development in the 1920s and 30s this book argues that the empathetic method can also be used in architectural interpretation While most existing scholarship tends to focus on formal and functional analysis this book proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer's innate psycho physiological perceptive abilities sensual and intuitive understandings of composition form and space are emphasized These aspects are especially significant because Modern Architecture lacks the traditional stylistic signs Including building analyses it shows how by visually reducing cubical forms and spaces to linear configurations the exteriors and interiors of Modern buildings can be interpreted via human perceptive abilities as dynamic movement systems commensurate with the new industrial transportation age This reveals an inner necessity these buildings express about themselves and their culture rather than just an explanation of how they are assembled and how they should be used The case studies highlight the contrasts between buildings designed by different architects rather than

concentrating on the few features that relate them to the zeitgeist It analyses the buildings directly as the objects of study not indirectly as designs filtered through a philosophical or theoretical discourse The book demonstrates that with technology and science affecting culture **Background Noise** Brandon LaBelle,2006-01-01 The rise of a prominent auditory culture reveals the degree to which sound art is lending definition to the 21st Century And yet sound art still lacks related literature to compliment and expand the realm of practice Background Noise sets out an historical overview while at the same time shaping that history according to what sound art reveals the dynamics of art to operate spatially through media of reproduction and broadcast and in relation to the intensities of communication and its contextual framework

Design Innovations for Contemporary Interiors and Civic Art Crespi, Luciano,2016-09-08 In some post industrial areas re designing structural interiors in an attractive way is becoming increasingly important to community members as it helps promote local pride and a higher quality of life Design Innovations for Contemporary Interiors and Civic Art examines novel techniques in structural designs in various cultural and social scenarios Featuring innovative application methods emergent trends and research on tools being utilized in the field this publication is a pivotal reference source for designers researchers practitioners and professionals interested in interior design urban culture and structural aesthetics **Aspects** Edward A. Vazquez,2018-01-02 Stretching lengths of yarn across interior spaces American artist Fred Sandback 1943 2003 created expansive works that underscore the physical presence of the viewer This book the first major study of Sandback explores the full range of his art which not only disrupts traditional conceptions of material presence but also stages an ethics of interaction between object and observer Drawing on Sandback s substantial archive Edward A Vazquez demonstrates that the artist s work with all its physical slightness and attentiveness to place as well as its relationship to minimal and conceptual art of the 1960s creates a link between viewers and space that is best understood as sculptural even as it almost surpasses physical form At the same time the economy of Sandback s site determined practice draws viewers focus to their connection to space and others sharing it As Vazquez shows Sandback s art aims for nothing less than a total recalibration of the senses as the spectator is caught on neither one side nor the other of an object or space but powerfully within it

Subject to Display Jennifer A. Gonzalez,2011-03-04 An exploration of the visual culture of race through the work of five contemporary artists who came to prominence during the 1990s Over the past two decades artists James Luna Fred Wilson Amalia Mesa Bains Pep n Osorio and Ren e Green have had a profound impact on the meaning and practice of installation art in the United States In Subject to Display Jennifer Gonz lez offers the first sustained analysis of their contribution linking the history and legacy of race discourse to innovations in contemporary art Race writes Gonz lez is a social discourse that has a visual history The collection and display of bodies images and artifacts in museums and elsewhere is a primary means by which a nation tells the story of its past and locates the cultures of its citizens in the present All five of the American installation artists Gonz lez considers have explored the practice of putting human subjects and their cultures on display by

staging elaborate dioramas or site specific interventions in galleries and museums in doing so they have created powerful social commentary of the politics of space and the power of display in settings that mimic the very spaces they critique These artists installations have not only contributed to the transformation of contemporary art and museum culture but also linked Latino African American and Native American subjects to the broader spectrum of historical colonialism race dominance and visual culture From Luna s museum installation of his own body and belongings as artifacts and Wilson s provocative juxtapositions of museum objects to Mesa Bains s allegorical home altars Osorio s condensed spaces bedrooms living rooms barbershops prison cells and Green s genealogies of cultural contact the theoretical and critical endeavors of these artists demonstrate how race discourse is grounded in a visual technology of display

Painters' Playbooks in the Art Market of Early Modern Amsterdam Weixuan W. Li, 2025-10-24 The art market in seventeenth century Amsterdam is renowned as a competitive multi layered arena where diverse artists catered to a broad and varied clientele How did this intricate market function How did individual painters navigate this system making business and artistic decisions that eventually gave shape to the so called Golden Age of Dutch art Existing economic and art historical methodologies have fallen short of providing holistic explanations *Painters Playbooks* introduces an innovative socio spatial approach using digital methods to examine the art market shedding light on the artistic development in seventeenth century Amsterdam By synthesizing various historical sources digitally this book delves into artists collective behaviours or the playbooks discernible in their location choices social relations and use of house interiors Analysing historical data through a socio spatial lens this book illustrates how the changes in artists playbooks not only shaped the multi layered market structure but also influenced artistic innovation in seventeenth century Amsterdam
