Style Psyche The Art Of Lundy Siegrist:

Style and Psyche Pavel Machotka, 1999 This book is the first to understand a painter's style as an expression of a style of perceiving Machotka establishes that the way a painter sees the world and thinks about it sets up the range of styles within which he can choose to work Of course a painter also works within his historical setting and Machotka sets the two lives in the context of the revolution in landscape painting launched by the Society of Six in the 1920s and the Bay Area Figurative painting in the 1950s While doing this he also presents a biography of each artist which is as sympathetic as it is closely observed The Oxford Handbook of the History of Psychology: Global Perspectives David B. Baker, 2012 The science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others but in today's global culture there is a greater need in psychology for international understanding This volume describes the historical development of psychology in countries throughout the world Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations' psychologies Each unique story adds another element to our understanding of the history of psychology The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of the human condition **Painting and Our Inner World** Pavel Machotka, 2012-12-06 That painting is at least in part an expression of the painter's personality is obvious from the differences between very impulsive and very controlled painters between the paintings of a Picasso for example and a Piet Mondriaan But these differences have not been looked at in a controlled setting In this book Machotka sets out to understand the images produced by a broad sample of students and to connect them to the students' inner lives to their interpersonal relations their wishes and fears their impulses and inhibitions Their image making was followed in detail and their personality was studied in a long clinical interview producing a rich individual picture of the style and substance of the inner life of each Then the images were grouped into seven types by cluster analysis The personal data were found to fit the image clusters closely for example images with little form and much narration were produced by people with strong compensatory longings while dense collaged images were made by participants who exercised relentless control over one major issue in their life Other individuals had a strong need to integrate their lives and produced well formed well composed images As expected no single motive explained all artistic activity but the style of the images such as their inhibited formality abstractness or fluid boldness reflected what could be called the map of each participant's interpersonal world **New Directions in Aesthetics, Creativity and the Arts** Paul Locher, Colin Martindale, Leonid Dorfman, 2020-02-10 The
