information science programs as well as for established professionals who want to refresh their knowledge of the latest developments in the field

Cataloging and Classification Standards and Rules John J Riemer, 2013-04-03 This is the first book to examine standards specifically as they apply to cataloging and classification while at the same time considering the field of library science as a whole The developments in standards detailed in Cataloging and Classification Standards and Rules portend great time savings in the cataloging process for those catalogers willing to advocate the necessary programming to their systems officer or bibliographic utility Standards in the library and information science community underlie and impact the work of librarians and information specialists on a daily basis yet remain inconspicuous to even the most knowledgeable in the field Cataloging and Classification Standards and Rules reviews the state of a full range of formal and informal standards and rules utilized in cataloging and classification It also provides historical perspective commentary assessment of significance and anticipation of future developments and evaluates the connections and interrelationships that exist among the various standards Chapters in Cataloging and Classification Standards and Rules are written by professionals who have been key figures in the development of standards and have accessed primary source material for the preparation of their articles They address these what exactly constitutes a standard how something becomes a standard how standards undergo change evaluation of and commentary on the effectiveness of current standards the latest information on several standards currently in development testing or implementation what the future may hold Cataloging and Classification Standards and Rules is a valuable reference book for both beginning and experienced professional librarians As managers and consumers of bibliographic information it is crucial that librarians understand the nature and status of a variety of formal and informal standards This book will assist them in this task Library school students specializing in cataloging and classification will also find this book an indispensable guide as they prepare themselves for employment in the field

Summarizing Information Brigitte Endres-Niggemeyer, 2012-12-06 Summarizing is the process of reducing the large volume of information in something like a novel or a scientific paper to a short summary or abstract comprising only the most essential points Summarizing is frequent in everyday communication but it is also a professional skill for journalists and scientific writers Automated summarizing functions are urgently needed by Internet users who wish to exploit the information available without being overwhelmed This book presents the state of the art of summarizing and surveys related research it deals with everyday and professional summarizing as well as computerized approaches The author focuses in detail on the cognitive processes involved and supports this with a multimedia simulation system on the accompanying CD ROM for Mac OS 7 5 and Windows 95

Organizing Knowledge: Introduction to Access to Information J.E. Rowley, John Farrow, 2018-01-18 This title was first published in 2000 For its third edition this text on knowledge organization and retrieval has been revised and restructured to accommodate the increased significance of electronic information resources With new sections on topics such as information retrieval via the Web metadata and managing information retrieval systems

the book explains principles relating to hybrid print based and electronic networked environments experienced by today's users. The book is an accessible introduction to knowledge organization for both undergraduate and postgraduate students of information management and information systems.

Cataloging and Classification Lois Mai Chan, Theodora Hodges, 2007. *Cataloging and Classification* Third Edition is a text for beginning students and a tool for practicing cataloging personnel. All chapters have been rewritten in this latest edition to incorporate recent developments, particularly the tremendous impact metadata and the Web have had on cataloging and classification.

Annual Review of Information Science and Technology Blaise Cronin, 2007. ARIST published annually since 1966 is a landmark publication within the information science community. It surveys the landscape of information science and technology, providing an analytical, authoritative, and accessible overview of recent trends and significant developments. The range of topics varies considerably, reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives. While ARIST continues to cover key topics associated with classical information science, e.g. bibliometrics, information retrieval, editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities.

The Organization of Information Arlene G. Taylor, Daniel N. Joudrey, 2008-12-23. This third edition of Taylor's modern classic continues to articulate the theory, principles, standards, and tools behind information organization. As with previous editions, it begins with strong justification for the continued importance of organizing principles and practice. Following a broad overview of the concept and its role in human endeavors, Taylor and Joudrey provide a detailed and insightful discussion of such basic retrieval tools as inventories, bibliographies, catalogs, indexes, finding aids, registers, databases, major bibliographic utilities, and other organizing entities, and subsequently trace the development of the organization of recorded information in Western civilization from 2000 B.C.E. to the present. Standards of codification, MARC, SGML, and various DTDs, controlled vocabularies, and ontologies, and Web 2.0 technologies are but a sample of its extensive topical coverage. *The Organization of Information* remains the title of choice for students and professionals eager to embrace the heritage, immediacy, and future of this fascinating field of study.

Innovations in Information Retrieval Allen Foster, Pauline Rafferty, 2011. The advent of new information retrieval (IR) technologies and approaches to storage and retrieval provide communities with previously unheard-of opportunities for mass documentation, digitization, and the recording of information in all its forms. This book introduces and contextualizes these developments and looks at supporting research in IR, the debates, theories, and issues. Contributed by an international team of experts, each authored chapter provides a snapshot of changes in the field as well as the importance of developing innovation, creativity, and thinking in IR practice and research. Key discussion areas include browsing in new information environments, classification revisited, a web of knowledge, approaches to fiction retrieval, research music, information retrieval research, folksonomies, social tagging, and information retrieval, digital information interaction, as semantic navigation, assessing web search machines, a webometric
