Submarine Detection from Space Hung P. Nguyen,1993 **Bulletin of the Atomic Scientists** ,1994-09 **Bulletin of the Atomic Scientists** ,1994-09 **The American Bibliography of Slavic and East European Studies** Patt Leonard,Rebecca Routh,2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology *Professional Journal of the United States Army* ,1994 **Cold War Submarines** Norman Polmar,Kenneth J. Moore,2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary s homeland providing in many respects the most survivable nuclear deterrent of the Cold War For both East and West the modern submarine originated in German U boat designs obtained at the end of World War II Although enjoying a similar technology base by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence *The Militarization and Weaponization of Space* Matthew Mowthorpe,2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War Satellite reconnaissance navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space Today as the prominence of information technology computing and telecommunications advances so does the concept of space as a battlefield In *The Militarization and Weaponization of Space* Matthew Mowthorpe diligently analyzes the military space policies of the United States the Soviet Union Russia and the People s Republic of China from the Cold War period to the present day Mowthorpe focuses on the development of the ballistic missile defense and other anti satellite systems and aptly assesses to what degree space will become armed This work cogently addresses an issue of increasing urgency to scholars of international politics *Quarterly Review of Military Literature* ,1994 **The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual** Ron Martini,2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the

boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal

Admiral Gorshkov Norman C Polmar, Thomas A Brooks, 2019-03-15 Admiral of the Fleet of the Soviet Union Sergei G Gorshkov was the product of a tradition unlike those of his Western contemporaries. He had a unique background of revolution, civil war, world wars, and the forceful implementation of an all-controlling communist dictatorship. Out of this background of violence and overwhelming transformation came a man with a vivid appreciation of the role and value of navies but with his own unique ideas about the kind of navy that the Soviet Union required and the role that navy should play in Soviet military and national strategy. Western naval observers have persisted in attempting to define Admiral Gorshkov in Western naval terms. Many of these observers have been baffled when they found that the man and his actions simply did not fit conventional narratives. This book lays out the tradition, background, experiences, and thinking of the man as they relate to the development of the Soviet Navy that Gorshkov commanded for almost three decades and that was able to directly challenge the maritime dominance of the United States, a traditional sea power. His influence persists to this day as the Russian Navy that is at sea in the twenty-first century is to a significant degree based on the fleet that Admiral Gorshkov built.
