Environmental Criminology Martin A. Andresen, 2014-03-14 The field of environmental criminology is a staple theoretical framework in contemporary criminological theory With this book Martin Andresen presents the first comprehensive and sole authored textbook on this influential and compelling school of criminological thought He covers a wide range of topics including the origins of environmental criminology the primary theoretical frameworks such as routine activity theory geometric theory of crime rational choice theory and the pattern theory of crime the practical application of environmental criminology an examination of how theories are operationalized and tested policy implications for the practice of crime prevention As well as these popular topics Andresen also discusses also a number of topics that are at the leading edge of research within environmental criminology This text will be ideal for courses on crime prevention where students are often encouraged to consider policy problems and apply theory to practice This book offers up environmental criminology as a theoretical framework for making sense of complex neighbourhood problems meaning that it will be perfect for modules on geography of crime crime analysis and indeed environmental criminology It would also be a good supplement for courses on criminological theory

Environmental Criminology and Crime Analysis Richard Wortley, Michael Townsley, 2016-11-01 Environmental criminology is a term that encompasses a range of overlapping perspectives At its core the many strands of environmental criminology are bound by a common focus on the role that the immediate environment plays in the performance of crime and a conviction that careful analyses of these environmental influences are the key to the effective investigation control and prevention of crime This new edition brings together leading theorists and practitioners in the field to provide a comprehensive integrative coverage of the field of environmental criminology and crime analysis This book is divided into three sequential parts Understanding the crime event explores routine activity approach crime pattern theory the rational choice perspective and situational precipitators of crime Analysing crime patterns discusses crime mapping offender mobility repeat victimisation geographic profiling and crime scripts Preventing and controlling crime covers topics including problem oriented policing situational crime prevention and environmental design Fully updated and including new chapters on crime scripts and offender mobility a scene setting introductory overview and critical thinking questions at the end of each chapter this text is an essential and comprehensive resource for practitioners and students taking courses on environmental criminology crime analysis and crime prevention

Handbook of Crime Prevention and Community Safety Nick Tilley, Aiden Sidebottom, 2017-03-27 This second edition of the Handbook of Crime Prevention and Community Safety provides a completely revised and updated collection of essays focusing on the theory and practice of crime prevention and the creation of safer communities This book is divided into five comprehensive parts Part I brand new to this edition is concerned with theoretical perspectives on crime prevention and community safety Part II considers general approaches to preventing crime including a new chapter on the theory and practice of deterrence Part III focuses on specific

crime prevention strategies including a new chapter on regulation for crime prevention Part IV focuses on the prevention of specific categories of crime and the fear they generate including new chapters on organised crime and cybercrime Part V considers the preventative process the methods through which presenting problems can be analysed responses formulated and implemented and their effectiveness evaluated Bringing together leading academics and practitioners from the UK US Australia and the Netherlands this volume will be an invaluable reference for researchers and practitioners whose work relates to crime prevention and community safety as well as for undergraduate and postgraduate courses in crime prevention

Offenders on Offending Wim Bernasco, 2013-01-11 Our knowledge of crime is based on three types of sources the criminal justice system victims and offenders For technological and other reasons the criminal justice system produces an increasing stream of information on crime The rise of the victimization survey has given the victims a much larger role in our study of crime There is however no concomitant development regarding offenders This is unfortunate because offenders are the experts when it comes to offending In order to understand criminal behavior we need their perspective This is not always a straightforward process however and information from offenders is often unreliable This book is about what we can do to maximise the validity of what offenders tell us about their offending Renowned experts from various countries present their experiences and insights with a clear focus on methodological issues of fieldwork among various types of offender populations Each contribution deals with with a few central issues How can offenders be motivated to participate in research How can offenders be motivated to tell the truth on their offending How can the information that offenders provide be checked and validated What can we learn from offenders that cannot be accessed from other sources With the aim of obtaining valid and reliable information how where and under which conditions should we observe offenders and talk to them

The Oxford Handbook of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2015-12 This handbook presents a series of essays that captures not the past of criminology but where theoretical explanation is headed The volume is replete with ideas discussions of substantive topics with salient theoretical implications and reviews of literatures that illuminate avenues along which theory and research evolve

Crime Mapping Case Studies Spencer Chainey, Lisa Tompson, 2008-02-28 Crime Mapping Case Studies From Research to Practice provides a series of key examples from practice and research that demonstrate applications of crime mapping and its effect in many areas of policing and crime reduction This book brings together case studies that show how crime mapping can be used for analysis intelligence development monitoring performance and crime detection and is written by practitioners for practitioners Leading researchers in the field describe how crime mapping is developing and exposing analytical methodologies and critiquing current practices Including global case studies that demonstrate a particular application analytical technique or new theoretical concept this text offers a truly global overview of this rapidly growing area of interest Unlike other texts on this topic this book identifies mistakes and challenges in this field of enquiry to aid the reader in understanding the basics of this

technique giving them the opportunity to learn further

Crime and Everyday Life Marcus Felson, Mary

Eckert, 2015-01-29 *Crime and Everyday Life* Fifth Edition offers a bold approach to crime theory and crime reduction. The text shows how crime opportunity is a necessary condition for illegal acts to occur. The authors offer realistic, often common sense ways to reduce or eliminate crime and criminal behavior in specific settings by removing the opportunity to complete the act. Using a clear and engaging writing style, author Marcus Felson and new co-author Mary Eckert talk directly to the student about criminal behavior, the routine activity approach, and specific crime reduction ideas. The authors emphasize how routine daily activities set the stage for illegal acts, offering fascinating new ideas and examples not presented in earlier editions.

Most importantly, this book teaches the student how to think about crime and then do something about it. **Geographic Information Systems and Crime Analysis** Fahui Wang, 2005-01-01

Computerized crime mapping or GIS in law enforcement agencies has experienced rapid growth, particularly since the mid 1990s. There has also been increasing interests in GIS analysis of crime from various academic fields including criminology, geography, urban planning, information science, and others. *Geographic Information Systems and Crime Analysis* features a diverse array of GIS applications in crime analysis, from general issues such as GIS as a communication process and inter-jurisdictional data sharing to specific applications in tracking serial killers and predicting juvenile violence.

Cognition and Crime Benoit Leclerc, Richard Wortley, 2013-08-15 The rational choice perspective developed by Cornish and Clarke in 1986 provides criminologists with a valuable and practical framework for purposes of crime control and prevention. More than twenty-five years later, *Cognition and Crime* pushes the boundaries of this field of research by bringing together international leading or emerging researchers in this area of script analysis into a single volume for the first time. It also presents a series of original contributions on offender decision making during crime and crime script analysis, as well as offering a critical perspective of what could be achieved in the future to further help develop this field of research for prevention purposes. In addition, each empirical chapter treats a specific and important form of crime such as stalking, violence, drug dealing, human trafficking for sexual exploitation, child sexual abuse, and transnational illegal market of endangered species. Academics and students from various backgrounds and interested in investigating and preventing crime will benefit from this book as it applies crime script analysis and discusses new and future developments in regards to this approach and the rational choice perspective. This volume will be of particular relevance for practitioners such as police officers and crime investigators.

Child Becomes a Reader: Kindergarten through Grade 3: Proven Ideas from Research for Parents (rev. 2nd ed.) Bonnie B. Armbruster, Fran Lehr, Jean Osborn, 2003 This booklet contains a short summary of what scientific research says about how children learn to read and write. It also discusses things you can do with your child at three different grade levels: kindergarten, first grade, and second and third grades. These activities will help the child become a reader. In addition, this booklet contains a list of helpful terms and ideas for books to read and organizations to contact if you would like more help or information. AMT **The**
