has been to assemble powerful statements from international authorities that encapsulate leading edge thinking on a group of interconnected themes based on the notion of developing successful leadership in and beyond schools. In so doing the text examines strategies for existing leaders developing their full capacity as well as enhancing the skills of those new to or aspiring to a leadership role. The chapters contributed by a carefully selected group of leading educationalists present insights on a number of central themes including developing new skill sets in leadership, the ethical and moral dimensions of leading an organisation, Leadership for instructional and pedagogical success, developing leadership capacity and capability through strategic activity. Rather than taking a technical approach of how to undertake the managerial or administrative tasks, the authors seek instead to develop critical leadership perspectives and skills with chapters on vitally important topics such as strategies for maximizing the potential of the leadership team as a whole. They draw not only upon the literature in the field of educational leadership but also a wider literature in the field of business and management. This diversity of perspective ensures this book's appeal to a broad international readership.
