**Handbook of Succulent Plants: Monocotyledons** Urs Eggli,2012-12-06 Handbooks devoted to succulent plants including cacti have a long standing tradition and the demand for updated editions is a good indication of the high degree of interest that exists in this fascinating group of plants While first handbooks devoted to the family Cactaceae were already published in the 19th century the first handbook dealing with the so called other succulents was authored by Hermann Jacobsen and published in 1954 1955 then called *Handbuch der sukkulenten Pflanzen* A revised and enlarged English edition was made available in 1959 and was repeatedly reprinted in the following years A major step towards a compact handbook including short descriptions full synonymy and hundreds of illustrations was the publication of the first edition of Hermann Jacobsen s celebrated *Sukkulentenlexikon* in 1970 followed by the English edition in 1975 and a revised German edition in 1981 finished by Klaus Hesselbarth following Hermann Jacobsen s death in August 1978 The demand for updated compact information on succulent plants has not diminished since then and contrary to Hermann Jacobsen s opinion preface to the German edition 1970 that the number of papers dealing with succulent plants was on the decline the interest in succulent plants was growing both among hobbyists and among botanists The results are numerous new taxa in many families and many monographs of previously little known groups have been published in the last 30 years Accordingly a need for a New Lexicon was beginning to be felt both for other succulents and for cacti      **Illustrated Handbook of Succulent Plants: Crassulaceae** Urs Eggli,2012-12-06 The present volume covering the Crassulaceae marks the completion of the successful handbook series that presents a complete coverage of the so called other succulents i e of all taxa of succulent plants with the exception of the Cactaceae It is with pride that this volume is now put before the public Together with its predecessors it is the fruit of a truly international project Not only does the present volume constitute the first complete synopsis of the large

and horticulturally important family Crassulaceae published since the treatment by Berger 1930 but the handbook series as a whole is a landmark in succulent plant literature The history of the project that eventually led to the publication of the present handbook series was outlined in the Preface to the Monocotyledons Volume published in the summer of 2001 A short summary of its history will therefore suffice Handbooks devoted to succulent plants including cacti have a long standing tradition First treatments covering the family Cactaceae were already published in the 19th century but the first handbook dealing with the so called other succulents authored by Hermann Jacobsen was only published in 1954 1955 then called Handbuch der sukkulenten Pflanzen A revised and enlarged English edition was published in 1959 and was repeatedly reprinted subsequently
