Plutocratic Socialism Mark T. Mitchell, 2022-05-19 A proletarianized citizenry ruled by a class of insolent plutocrats is incompatible with the republican form of government established by the US Constitution Without an effective majority of citizens who own property and whose character has been shaped by property ownership a vibrant middle class the Founders Constitution will not survive Our current age of Plutocratic Socialism is a specific manifestation of a pathology the Founders feared Recovery must begin with a simple yet profound axiom private property and political freedom stand or fall together

Climate Rationality Jason S. Johnston, 2021-08-19 Most environmental statutes passed since 1970 have endorsed a pragmatic or precautionary principle under which the existence of a significant risk is enough to trigger regulation At the same time targets of such regulation have often argued on grounds of inefficiency that the associated costs outweigh any potential benefits In this work Jason Johnston unpacks and critiques the legal economic and scientific basis for precautionary climate policies pursued in the United States and in doing so sheds light on why the global warming policy debate has become increasingly bitter and disconnected from both climate science and economics Johnston analyzes the most influential international climate science assessment organizations the US electric power industry and land management and renewable energy policies Bridging sound economics and climate science this pathbreaking book shows how the United States can efficiently adapt to a changing climate while radically reducing greenhouse gas emissions **Hilgardia**, 1926
