Temple of the Cosmos Jeremy Naydler,1996-04 Recreates the ancient Egyptian sacred path of spiritual unfolding

Land of the Fallen Star Gods J. S. Gordon,2013-08-11 A radical reinterpretation of Egypt's ancient origins and its esoteric philosophy Explains how the spontaneous appearance of Egyptian civilization 5 000 years ago represents the remnants of an ancient worldwide advanced culture Explores astrophysical geophysical and anthropological evidence of forgotten civilizations beneath the Mediterranean and along the coast of northwestern Africa Examines the mystical traditions and initiatory rituals of the ancient Egyptians and their sophisticated understanding of precession human evolution and divine purpose Radically reinterpreting the time line of prehistory J S Gordon shows that Egyptian civilization is 50 000 years older than acknowledged by Egyptology He explores astrophysical cosmological geophysical linguistic and anthropological evidence to reveal forgotten civilizations hidden beneath the Mediterranean and along the coast of northwestern Africa He explains how the spontaneous full fledged appearance of Egyptian and Sumerian civilizations 5 000 years ago represents not the birth of civilization but the remnants of an immensely ancient and sophisticated worldwide culture ranging from Tibet and China to Atlantis and the vastly larger continent of which it once was part Examining the mystical traditions and initiatory rituals of the ancient Egyptians Gordon shows that they were not a culture obsessed with death and tombs but one structured around cosmic knowledge with an astronomical competence that modern science has yet to attain He reveals their sophisticated understanding of the precession of the equinoxes and its inextricable connection to human evolution and divine purpose an understanding that could only have arisen from many millennia of high level observation Illustrating in detail the sacred geometry of the Great Pyramid and the Giza site Gordon explains how the coherence of Egyptian mystico scientific concepts and their art architecture and engineering reveals a mission to achieve a reflection of Heaven on Earth through the careful location orientation and stellar alignment of their temples He shows the Egyptian Mystery School and its scientific knowledge and universal spiritual philosophy to be a legacy left to the ancient Egyptians by the fallen star gods divine celestial beings who came to Earth long ago and founded the original now forgotten culture and who will return again with the turning of the Great Year

The Future of the Ancient World Jeremy Naydler,2009-07-24 The sacred consciousness that prevailed in antiquity is the key to unlocking our future Shows how scientific consciousness which gives primacy to the sense of sight estranged us from the participatory spiritual consciousness of antiquity Explores the vital importance of the imagination in reconnecting us to the spirit world The Future of the Ancient World sheds new light on the evolution of consciousness from antiquity to modern times The twelve essays in this book examine developments in human consciousness over the past five thousand years that most history books do not touch In ancient times human beings were finely attuned to the invisible world of the gods spirits and ancestors Today by contrast our modern scientific consciousness regards what is physically imperceptible as unreal Our experience of the natural world has

shifted from an awareness of the divine presence animating all things to the mere scientific analyses of physical attributes a deadened mode of awareness that relies on our ability to believe only in what we can see In these richly illustrated and wide ranging essays that span the cultures of ancient Egypt Mesopotamia Greece Rome and the early Christian period Jeremy Naydler shows how the consciousness that prevailed in ancient times may inspire us toward a future in which we once again reconnect with invisible realms If the history of consciousness bears witness to the loss of visionary and participatory awareness it also shows a new possibility the possibility of developing a free and objective relationship to the spirit world Naydler urges us not only to draw inspiration from the wisdom of the ancients but to carry this wisdom forward into the future in a renewed relationship to the spiritual that is based on human freedom and responsibility

Cities, and Thrones, and Powers Stephen R. L. Clark, 2022-06-29 What would a reappeared Plotinus answer today if asked how we might build a divinely ordered city That is the question at the core of this unique book and Stephen Clark takes us on a wide ranging deep dive to uncover possible answers To do so he first gives an account of the Plotinian philosophy of mind and metaphysics showing how Plotinus nicely balances the entanglement of soul body composites our immediate identities with the workings of the World Soul and the eternal soul that animates from within Drawing on later Christian and Islamic interpretations of the Neoplatonic tradition and parallel developments in Hindu thought he then describes the various social forms that seem to be the inevitable context of our lives here and now Furthermore we discover that the form a Plotinian religion adopts depends on taking seriously the thought of reincarnating souls and wandering hermits but now with the difference in our time that although some sages may be content to consider themselves simple wanderers in a world without borders or settled communities some will follow the same path as Buddhists Epicureans and Christians forming communities of friends loyal to their founder and to the fellowship of the Sangha We learn as well that in due course even those among the hermits who prefer to go almost literally alone to the Alone will become part of dispersed unhierarchical communities Finally Clark offers cautious thoughts about our likely futures dependent both on current technological advances and on the realistic suspicion shared by our predecessors that catastrophes and wholly unexpected turns are always to be expected

Embodying Osiris Thom F Cavalli, 2013-08-15 The modern Western movement to embrace Eastern spiritual traditions usually stops with India and the Orient Westerners have yet to discover the wisdom that dates back even further to ancient Egypt With a Jungian perspective clinical psychologist Dr Thom F Cavalli plumbs that wisdom through the myth of Osiris the green skinned Egyptian god of vegetation and the Underworld As no one else has done Cavalli draws on Osiris's death and resurrection as a guide to spiritual transformation The myth represents the joining of the conscious and the unconscious the light and the dark life and death and shows how to live our temporal existence in service to and anticipation of eternal life Cavalli sees the ancient art of alchemy which attempted to turn lead into gold as the key The alchemical recipe solve et coagula solution and coagulation encoded in the myth describes the integration of all parts of a person and the method for achieving an

experience of immortality in life and eternal life after death The Osiris myth thus provides a model for the contemporary quest for individuation the Jungian term for integrating ego and self body and soul in the process of becoming whole **The Secret Life of Puppets** Victoria Nelson,2003-11-01 In one of those rare books that allows us to see the world not as we've never seen it before but as we see it daily without knowing Victoria Nelson illuminates the deep but hidden attraction the supernatural still holds for a secular mainstream culture that forced the transcendental underground and firmly displaced wonder and awe with the forces of reason materialism and science In a backward look at an era now drawing to a close The Secret Life of Puppets describes a curious reversal in the roles of art and religion where art and literature once took their content from religion we came increasingly to seek religion covertly through art and entertainment In a tour of Western culture that is at once exhilarating and alarming Nelson shows us the distorted forms in which the spiritual resurfaced in high art but also strikingly in the mass culture of puppets horror fantasy literature and cyborgs from the works of Kleist Poe Musil and Lovecraft to Philip K Dick and virtual reality simulations At the end of the millennium discarding a convention of the demonized grotesque that endured three hundred years a Demiurgic consciousness shaped in Late Antiquity is emerging anew to re-divinize the human as artists like Lars von Trier and Will Self reinvent Expressionism in forms familiar to our pre-Reformation ancestors Here as never before we see how pervasively but unwittingly consuming art forms of the fantastic we allow ourselves to believe **In the Shadow of the Machine** Jeremy Naydler,2018-05-29 Contemporary life is so deeply reliant upon digital technology that the computer has come to dominate almost every aspect of our culture What is the philosophical and spiritual significance of this dependence on electronic technology both for our relationship to nature and for the future of humanity And what processes in human perception and awareness have produced the situation we find ourselves in As Jeremy Naydler elucidates in this penetrating study we cannot understand the emergence of the computer without seeing it within the wider context of the evolution of human consciousness which has taken place over millennia Modern consciousness he shows has evolved in conjunction with the development of machines and under their intensifying shadow The computer was the product of a long historical development culminating in the scientific revolution of the 17th century It was during this period that the first mechanical calculators were invented and the project to create more complex thinking machines began in earnest But the seeds were sown many hundreds of years earlier deep in antiquity Naydler paints a vast panorama depicting human development and the emergence of electronic technology His painstaking research illuminates an urgent question that concerns every living person today What does it mean to be human and what if anything distinguishes us from machines *Feasts of Light* Normandi Ellis,1999-03-01 Provides information on the Egyptian goddesses and their festivals including Isis and Hathor Neith the cobra and Bast the cat and includes information on astrology sacred plants aromatics and birth and mourning rituals **The African Presence and Influence on the Cultures of the Americas** Brenda M.
