The Humanity of Cities John Gulick, 1989 I recommend this book highly to social scientists who are looking for a review or refresher course in urbanology advanced undergraduate students and introductory graduate students As our American college student bodies become more culturally diverse The Humanity of Cities provides a welcome respite from the usual culture bound texts that give limited attention for effect only of the stereotypical Third World Contemporary Sociology Gulick s style is to develop each topic by presenting appropriate case studies He manages to include an enormous range of studies and he wisely reaches out beyond anthropology to the many fields that concern themselves with urban life This book is consequently an excellent compilation of

the recent history of theoretical and empirical research on cities The 28 page bibliography is itself a tour de force American Anthropologist Combining major urban theories with empirical studies from around the world the author offers poignant glimpses into urban life including the streets of San Francisco as seen through the eyes of a proud garbage collector the marketplace of Ibadan as seen by a petty food trader the curiously empty streets of Fun city a California retirement community and Cairo s teeming cemetery the City of the Dead filling with the living The problems of urban life are shown to be more a result of worldwide forces rather than the intrinsic nature of cities This major new and timely contribution to the field is a most useful way to introduce urban scholars planners and students in a variety of disciplines to The Humanity of Cities A complete teachers manual makes this the perfect text [Ancient West Mexico in the Mesoamerican Ecumene](#) Eduardo Williams,2020-02-20 This volume presents a long overdue synthesis and update on West Mexican archaeology Ancient West Mexico has often been portrayed as a marginal or underdeveloped area of Mesoamerica This book shows that the opposite is true and that it played a critical role in the cultural and historical development of the Mesoamerican ecumene **World Architecture and Society** Peter Louis Bonfitto,2021-12-06 This two volume encyclopedia covers buildings and sites of global significance from prehistoric times to the present day providing students with an essential understanding of architectural development and its impact on human societies This two volume encyclopedia provides an in depth look at buildings and sites of global significance throughout history The volumes are separated into four regional sections 1 the Americas 2 Europe 3 Africa and the Middle East and 4 Asia and the Pacific Four regional essays investigate the broader stylistic and historical contexts that describe the development of architecture through time and across the globe Entries explore the unique importance of buildings and sites including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions Other entries highlight remarkable stories of architectural achievement and memory like those of Tuskegee University a site hand built by former slaves or the Hiroshima Peace Memorial Park which was built at the site of the atomic detonation Each entry focuses on the architectural but includes strong consideration of the social impact importance and significance each structure has had in the past and in the present **Catalog of Printed Books** Bancroft Library,1969
