The First Wave Gillian Dooley, Danielle Clode, 2019-06-20 The European maritime explorers who first visited the bays and beaches of Australia brought with them diverse assumptions about the inhabitants of the country most of them based on sketchy or non existent knowledge contemporary theories like the idea of the noble savage and an automatic belief in the superiority of European civilisation Mutual misunderstanding was almost universal whether it resulted in violence or apparently friendly transactions Written for a general audience *The First Wave* brings together a variety of contributions from thought provoking writers including both original research and creative work Our contributors explore the dynamics of these early encounters from Indigenous cosmological perspectives and European history of ideas from

representations in art and literature to the role of animals food and fire in mediating first contact encounters and Indigenous agency in exploration and shipwrecks The First Wave includes poetry by Yankunytjatjara Aboriginal poet Ali Cobby Eckermann fiction by Miles Franklin award winning Noongar author Kim Scott and Danielle Clode and an account of the arrival of Christian missionaries in the Torres Strait Islands by Torres Strait political leader George Mye Border Security Peter Chambers,2017-09-27 What kind of a world is one in which border security is understood as necessary How is this transforming the shores of politics And why does this seem to preclude a horizon of political justice for those affected Border Security responds to these questions through an interdisciplinary exploration of border security politics and justice Drawing empirically on the now notorious case of Australia the book pursues a range of theoretical perspectives including Foucault's work on power the systems theory of Niklas Luhmann and the cybernetic ethics of Heinz Von Foerster in order to formulate an account of the thoroughly constructed and political nature of border security Through this detailed and critical engagement the book's analysis elicits a political alternative to border security from within its own logic thus signaling at least the beginnings of a way out of the cost cruelty and devaluation of life that characterises the enforced reality of the world of border security **The Man Who Ate His Boots** Anthony Brandt,2011-03-22 After the triumphant end of the Napoleonic Wars in 1815 the British took it upon themselves to complete something they had been trying to do since the sixteenth century find the fabled Northwest Passage For the next thirty five years the British Admiralty sent out expedition after expedition to probe the ice bound waters of the Canadian Arctic in search of a route and then after 1845 to find Sir John Franklin the Royal Navy hero who led the last of these Admiralty expeditions Enthralling and often harrowing The Man Who Ate His Boots captures the glory and the folly of this ultimately tragic enterprise Alas, for the Pelicans Anne Chittleborough,2002 In 1802 a Frenchman and an Englishman famously encountered each other off the shores of South Australia The voyages of discovery of Nicolas Baudin and Matthew Flinders opened the way for the increasingly rapid colonisation of Terra Australis *Atmosphere of Hope* Tim Flannery,2015-08-26 Ten years after his internationally bestselling The Weather Makers acclaimed scientist and author Tim Flannery argues that Earth's climate system is approaching a crisis Catastrophe is not inevitable but time is fast running out In the lead up to the United Nations Climate Change Summit to be held in Paris in December Atmosphere of Hope provides both a snapshot of the trouble we are in and an up to the minute analysis of some of the new possibilities for mitigating climate change that are emerging now From atmospheric carbon capture through extensive seaweed farming CO2 snow production in Antarctica and the manufacture of carbon rich biochar to reflecting the sun's rays by releasing sulphur into the atmosphere and painting landscapes and cities white Flannery outlines an array of innovative technologies that give cause for hope Tim Flannery has published over thirty books including the award winning The Future Eaters The Weather Makers and Here on Earth and the novel The Mystery of the Venus Island Fetish In 2005 he was named Australian Humanist of the Year and in 2007 Australian of the Year In 2007 he
