Terranova The Ethos And Luck Of Deepsea Fisherman:

Terranova Joseba Zulaika,1981 **Terranova** Rosa Garcia-Orellan,2010 Terranova is the story of Spain's twentieth century industrial cod fishery on the Grand Banks of Newfoundland. It combines oral history including interviews with over 300 participants in the fishery with socio-political economic history to describe how the industry and Spain itself evolved over seven decades. Terranova pays special attention to how work and life onboard trawlers changed in 1926 when Spain's industrial fishery began and how they have evolved through the turn of the twenty-first century. It concludes by describing how technological advances and increased competition among fishers brought the collapse of the Newfoundland cod fishery in 1992.

The Biology of Religious Behavior Jay R. Feierman,2009-06-08 Offers a fresh and detailed take on the evolution of religious behavior from a biobehavioral perspective promoting a new understanding that may help build bridges across the religious divide. There has been much recent interest in the study of religion from the perspective of Darwinian evolution. The Biology of Religious Behavior: The Evolutionary Origins of Faith and Religion offers a broad overview of the topic written by internationally recognized experts. In addition to its primary focus on religious behavior, the book addresses other important aspects of religion such as values, beliefs, and emotions as they affect behavior. The contributors approach the evolution of religion by examining the behavior of individuals in their everyday lives. After describing various religious behaviors, the contributors consider the behaviors with reference to their evolutionary history, development during the lifetime of the individual, proximate causes, and adaptive value. Happily, this foray into understanding religion from a biobehavioral perspective demonstrates that at the biological and behavioral levels, what unites the different religions of the world is far greater than what divides them.

The Oxford Handbook of Hellenic Studies George Boys-Stones, Barbara Graziosi, Phiroze Vasunia,2009-08-20 A collection of some seventy original articles which explore the ways in which ancient Greece has been and might be studied. The emphasis is on the breadth and potential of Hellenic Studies as a flourishing and exciting intellectual arena and also upon its relevance to the way we think about ourselves today.

The Human Shore John R. Gillis,2012-10-17 Since before recorded history, people have congregated near water. But as growing populations around the globe continue to flow toward the coasts on an unprecedented scale and climate change raises water levels, our relationship to the sea has begun to take on new and potentially catastrophic dimensions. The latest generation of coastal dwellers lives largely in ignorance of the history of those who came before them, the natural environment, and the need to live sustainably on the world's shores. Humanity has forgotten how to live with the oceans. In The Human Shore, a magisterial account of 100,000 years of seaside civilization, John R. Gillis recovers the coastal experience from its origins among the people who dwelled along the African shore to the bustle and glitz of today's megacities and beach resorts. He takes readers from discussion of the possible coastal location of the

Garden of Eden to the ancient communities that have existed along beaches bays and bayous since the beginning of human society to the crucial role played by coasts during the age of discovery and empire An account of the mass movement of whole populations to the coasts in the last half century brings the story of coastal life into the present Along the way Gillis addresses humankind's changing relationship to the sea from an environmental perspective laying out the history of the making and remaking of coastal landscapes the creation of ports the draining of wetlands the introduction and extinction of marine animals and the invention of the beach while giving us a global understanding of our relationship to the water Learned and deeply personal *The Human Shore* is more than a history it is the story of a space that has been central to the attitudes plans and existence of those who live and dream at land's end **The Fish Factory** Barbara J.

Garrity-Blake, Barbara Jean Garrity, 2005 Focusing on the menhaden fishermen of the southern coastal regions *The Fish Factory* is an engaging and insightful exploration of what work means to different social groups employed within the same industry Since the nineteenth century the menhaden industry in the South has been traditionally split between black crews and white captains Using life histories historical research and anthropological fieldwork in Reedville Virginia and Beaufort North Carolina Barbara Garrity Blake examines the relationship between these two groups and how the members of each have defined themselves in terms of their work The author finds that for the captains and other white officers of the menhaden vessels men born and bred for a life on the water work is a key source of identity Black crewmen however have insisted on a separation between work and self they view their work primarily as a means of support rather than an end in itself In probing the implications of this contrast Garrity Blake describes captain crew relations within both an occupational context and the context of race relations in the South She shows how those at the bottom of the shipboard hierarchy have exercised a measure of influence in a relationship at once asymmetrical and mutually dependent She also explores how each group has reacted to the advent of technology in their industry and most recently to the challenges posed by those proclaiming a conservationist ethic **Bandits at Sea** C.R. Pennell, 2001 The romantic fiction of pirates as swashbuckling marauders terrorizing the high seas has long eclipsed historical fact *Bandits at Sea* offers a long overdue corrective to the mythology and the mystique which has plagued the study of pirates and served to deny them their rightful legitimacy as subjects of investigation

scholars proceed from the holistic assumption that the physical world and human societies are always inextricably linked. As they incorporate diverse forms of knowledge, their work reaches beyond anthropology to bridge the sciences, social sciences, and the humanities, and to forge working relationships with non-academic communities and professionals. Theoretical issues such as the cultural dimensions of context, knowledge, and power are articulated alongside practical discussions of building partnerships, research methods, and ethics, and strategies for implementing policy. *New Directions in Environment and Anthropology* will be important for all scholars and non-academics interested in the relation between our species and its biotic and built environments. It is also designed for classroom use in and beyond anthropology, and students will be greatly assisted by suggested reading lists for their further exploration of general concepts and specific research.
